ENGINEER KNEESE REPORTS ON WORK ON CROSS STREETS

The regular semi-monthly meeting of the board of trustees of Daly City was held last Monday evening in the City Hall. Trustee Bodien was absent on account of illness, all other members of the board being present.

City Engineer Kneese reported that the work of paving and surfacing the old dirt cross streets in the Vista Grande tract is preceding rapidly, and these streets will be open to traffic in the near future.

An application for a permit to erect a pole on Mission street was received from the Pacific Gas and Electric Company. After some discussion it was laid over for further consideration.

The building commitee reported substantial progress in the wrecking of the shacks erected early in Daly City's history by refugees of the San Francisco earthquake and fire of 1906. The few remaining ones will soon be torn down under the direction of Chief of Police Doyle.

The meeting, one of the shortest in the board's history, was adjourned early.

MUST AVOID ILLEGEL SALE OF CIGARETTES

Chief of Police Doyle wishes to call the attention of all interested to the fact that the sale of cigarettes to minors is illegal, and that the law will be rigidly enforced in this section.

The law is specific in the matter of selling cigarettes to minors. Chapter 213, Section 3, of the Revised Section says:

"Cigarettes, Sales of, to Minors.—Whoever sells a cigarette to a person under eighteen years of age, or whoever sells snuff or tobacco in any of its forms to a person under sixteen years of age, or, not being his parent or guardian, gives a cigarette to a person under eighten years of age, or gives snuff or tobacco in any of its forms to a person under sixteen years of age, shall be punished by a fine of not more than $50."

Chief Doyle and his officers are making a campaign to enforce this law, and will gather in any offender.

RALLY DAY PROGRAM AT GRACE CHURCH

Subject for next Sunday evening at Grace Presbyterian church will be "Was it a Joke? And if so is it Still a Joke?" Come and help to make the church what it is intended to be.

The services last Sunday were well worth while and a good time was had.

A rally day program is now being planned for the near future in the opening of the school work and the return of the many residents from their vacations.

Mr. and Mrs. Gatchell, together with their guest on the trip, Miss Katherine McKeown, returned from Taft on Wednesday, and report a fine trip, but mighty glad to get out of the extreme heat of that country, as going from Daly City, with its temperature of 65, into that of Taft, with its 110, makes quite a change.

No greater gift could be given Daly City and its people than just the united and devoted helpfulness of all its people to the work of building up the church and the real spirit of Christian brotherliness. Try it and see for yourself.

ALUMNI PICNIC TO BE HELD AT SEARSVILLE

A special meeting of the Alumni Association of Jefferson Union High was held Wednesday evening in the high school. The new members of the association, the class of '27, were welcomed by President Harold Fischer, Vice-President Rosa Bauer, Secretary Martha Worst and Treasurer Lawrence Vireno.

The date of the picnic to welcome the class of '27 was changed to Sunday, August 28. All members of the association will meet at 7:30 a. m., in front of the high school, for the trip to Searsville. Mr. and Mrs. L. Stark will act as chaperones, and an excellent program is promised. The picnic committee will meet next Wednesday at 8 p. m. to make final arrangements.

HAS REAL FISHING STORY

If you wish to hear a real exciting and satisfying fish story, just mention fishing to Ernest Micco, local butcher. Ernie has just returned from a visit to Bass Lake, and reports that he had no trouble in securing the limit whenever he went out after the elusive beauties. Among some of the larger ones taken by Ernie were one that weighed nine pounds and another that tipped the scales at seven pounds. And Ernie declares that the scales were accurate, and that he has proof of has catch.

DEATH ENDS WORK OF LOCAL OFFICER

Philip Fahy, one of the outstanding persons of this community, since the opening of the Crocker Tract in 1907 and of San Francisco and Contra Costa county since his boyhood, passed away last Monday evening.

He was one of those who treasured humorous anecdotes of his associates from the beginning of his carreer and to almost the end he enjoyed telling them so well that he was always interesting company.

His father, who was one of the pioneers of Pittsburg, Contra Costa county, lived to be long past ninety, and Philip believed he would follow in his footsteps and be spared to tell his tales for years to come. About six months ago he was afflicted with an incurable malady, but he never admitted it and kept up his humorous strain, firmly convinced that he was improving steadily, so his sickness was no distress to him. When his friends called he was ever cheerful and had something amusing to offer.

From the time he settled in this community he took an active interest in every movement for the betterment of public conditions. He was the leading member of the original Crocker Tract Improvement Club, attending every meeting, introducing new ideas, smoothing over difficulties, and stamping out dissension.

He was an ardent supporter of ex-Supervisor James T. Casey in his campaigns for lights and good roads. When Mr. Casey was elected supervisor, Philip Fahy became the first deputy health officer whose duty it was to collect the fees for burial permits. The position paid only a very small salary, but he filled it with the dignity and courtesy worthy of the most important place. As a consequence he continually gained new friends.

When Mr. Casey retired from the supervisorship, Philip Fahy was retained by the present Supervisor Thomas L. Hickey on account of his efficiency and friends. Besides collecting the fees for burial permits, he was a deputy registrar of voters, and as such he would go anywhere at any hour to accommodate the people who desired to register.

Thus he spent his public life, doing the best he knew to be of real assistance to his friends.

He was particularly proud of his home and family and his loyalty to every member was worthy of more than passing notice. He rejoiced in all their successes and sympathized deeply in their troubles. The high regard in which he was held by his family and numerous friends was evidenced by the great numbers who called to show their last respects at the funeral parlor and by the numerous floral oferings placed around his casket.

His funeral took place on Thursday morning. A solemn requiem high mass was celebrated for the repose of his soul at St. Maximus church. He was laid to rest in Holy Cross cemetery.

The sympathy of the whole community is extended to the bereaved wife and family in their sorrow. The kind-hearted, humorous, loyal Philip Fahy will long be remembered lovingly in three counties.

OFFICERS ARE INSTALLED BY EL CARMELO PARLOR

At the last regular meeting of El Carmelo Parlor No. 181, N. D. G. W., the following officers were installed for the ensuing term by District Deputy Grand President Mathais:

Sylvia Fischer, President; Alice Mathais, First Vice-President; Lorraine Wall, Second Vice-President; Dolores Barron, Third Vice-President; Collista Dalton, Financial Secretary; Josephine T. Johnson, Recording Secretary; Rose Mowry, Marshal; Florence McKendrick, Inside Sentinel; Frieda Schade, Outside Sentinel; Ida Doyle, Organist; Margaret McDonald, Fredericka Volkman and Mary May, Trustees. Rena Mathais was installed as Treasurer.

A delegation of members of Niantic Parlor of Native Sons of the Golden West called to invite El Carmelo Parlor to drill with them in Santa Cruz on Admission day. After the meeting refreshments were served.

16-YEAR OLD BOY INJURED IN CRASH

Donald Heaney, aged 16, of 119 Sickles avenue, was seriously injured Sunday morning when his bicycle collided with an automobile at Mission street and Sickles avenue. Young Heaney was riding south on Mission street when he collided with a machine driven by Frank Payne, 312 Miriam stret, Daly City, near Sickles avenue. Payne took the boy to the Mission Emergency hospital, where it was found that he had received a possible fracture of the skull, internal injuries, several broken ribs and cuts and bruises.

TAX COLLECTOR BRINGS SUIT FOR SALARY INCREASE

An alternative writ of mandate directing County Auditor John J. Shields to pay a salary balance, alleged to be due County Tax Collector Ambrose McSweeney as collector of county license fees, was issued at Redwood City on Wednesday by Judge George H. Buck, on a petition filed by the assessor and directed against the county auditor and Mrs. Grace L. Cooper, county treasurer.

The petition alleges that the state legislature of 1925 made provision for an additional salary of $500 a year to be paid to the county assessor for collection of licenses. Under the county government act of 1913, providing that no salary of a county official might be raised during the term of his office, the increase in his pay would not occur until he entered his new term last January, according to Mr. McSweeney.

Since that time he has made monthly demands on Auditor Shields for the additional salary due under the act of 1925, but has not received it, he alleges. The additional salary was provided for additional duties, all of which he performed without the additional pay until, under the act of 1925, he became entitled to the increase, it is stated.

His former salary of $3,500 per year became $4,000 per year last January, under the terms of the 1925 provision, McSweeney believes. He asks that Auditor Shields be required to draw a warrant for $291.62, representing the difference between the salary he should have received and that actually received since last January, and also that Auditor Shields be required hereafter to draw a monthly salary warrant for $33.33 in favor of the tax collector, instead of the monthly warrant for $291.66 which now constitutes the monthly pay check. The county treasurer is named as a party in the suit to insure payment of the increased salary warrant.

JEFFERSON ELEMENTARY SCHOOLS BEGIN NEW TERM

The elementary schools of Jefferson district began the new school year's work last Monday, after a summer vacation of eight weeks. They are the first of the county to open their doors for the children.

That they did not open too soon is evidenced plainly by the fact that almost every child was present the first day and every one was glad to be in his or her seat and anxious for more education.

Nearly all the mothers were very grateful, too, for the early opening, as it relieved them for a part of each school day from the anxiety of providing occupation for their children. The long vacations are very hard upon the mothers.

The only disappointment was the non-arrival of the state text books, in time. This never happened here before, and it is to be hoped that the present failure is the last one. However, the books will be on hand early next week.

All the rooms were well filled. Those of the Woodrow Wilson, Vista Grande and General Pershing schools were crowded to the limit. There is not the least doubt that the population is increasing.

During the vacation many of the rooms have been cleaned, tinted, and painted, and this work will be continued during week ends and holiday periods until it is completed in all the schools.

The trustees are anxious to have all the rooms as inviting as possible. To accomplish this they have spared no efforts.

PRESIDENT OF P. G. & E. SUCCUMBS TO ILLNESS

Wiggington E. Creed, president of the Pacific Gas and Electric Company, died last Saturday morning at Piedmont, following a week's illness. Mr. Creed was 50 years old and had been president of the Pacific Gas and Electric Company since 1920. He was also president of the C. A. Hooper Lumber Company and the Columbia Steel Company, as well as a director in the Wells Fargo Nevada National Bank, Associated Oil Company and several other corporations.

SAN MATEO COUNTY MAN HEADS SAFETY COUNCIL

Lee H. Newbert, for many years district manager of the Pacific Gas and Electric Company of San Mateo county, has been nominated for president of the East Bay Safety Council. His nomination has been endorsed by the nominating committee and the board of governors. Newbert was one of the founders of the San Mateo lodge, No. 1112, B. P. O. E., is a past Exalted Ruler of the organization and has a large circle of friends in San Mateo county.

JUNIPERO SERRA BOULEVARD TO BE EXTENDED SOUTH

The board of supervisors of San Francisco on Monday unanimously adopted a resolution providing for a joint highway district embracing San Francisco and San Mateo counties, this action being taken to further the plans for smashing the peninsula bottleneck.

The immediate purpose of the new measure is to provide for the widening and extension of the Junipero Serra boulevard to connect with San Mateo county's proposed Alameda de las Pulgas highway running through the heart of this county between the Skyline boulevard and the State highway.

Another highway district to include San Francisco, San Mateo and Santa Cruz counties is now pending before the board to pave the way for an $8,000,000 highway along the ocean shore to Santa Cruz.

Supervisor William H. Harrelson was appointed to act with San Francisco's street committee in confering with San Mateo county supervisors on the Junipero Serra and Alameda de las Pulgas project. In order to remove all obstacles, the board granted San Mateo county permission to use portions of the Hetch Hetchy acqueduct right-of-way, which parallels the route of the new boulevard.

CALIFORNIA'S GIFT TO FRENCH PEOPLE

California's gift of a huge section of a two thousand year old "sequoia gigantea" from the Sequoia National Park to the citizens of Paris, France, has been shipped from Lemon Cove, Tulare county, to Galveston, Texas, for transhipment by boat to New York City, whence it will be taken abroad by the delegation from this state to the Paris meeting of the American Legion next month, according to word received by State Adjutant James K. Fisk of the Legion from Paul Shoup of the Southern Pacific Railroad Company. The huge section of sequoia gigantea will be exhibited along the route to Galveston by local Posts of the American Legion. Upon its arrival in Paris, it will be placed in one of the parks of that city as a gift from the people and the World war veterans of the state.

POLICE DEPARTMENT NOTES

In every case where the occupants of a Daly City residence have reported the date of their vacation to the police department, with the address of their home, their place has been unmolested.

The night police patrol has found numerous windows open and ladders against buildings and spent considerable time removing these handy stairways for sneak thieves. Windows should be unlocked and opened for airing only when the house is occupied.

In case of suspicious characters being seen, call Randolph 55, at any time, day or night.

Due to the recent campaign by Traffic Officer Schramm, speeding has decreased greatly. Several recent evening speeders attempted the apparently handy alibi that they thought speeding during the night in the city was permissible up to 40 miles an hour, the limit on the open highway. The local 15 to 20 miles an hour law holds for every hour of the night and day.

The "Stop" arterial laws are being rigidly enforced.

SURPRISE ENGAGEMENT PARTY

A surprise engagement shower was held Tuesday evening at the home of Mrs. E. R. Blaylock, of Evergreen avenue, in honor of Miss Clara Foppiano. The bride-to-be was sent on a treasure hunt, guided by verses, in search of many beautiful gifts, and found them all quickly. A beautiful supper served to finish off the evening. Decorations of blue and pink set off a very pretty table. Those present were: Clara Foppiano, Enes Tacchi, Hester Blaylock, Clara Barsotti, Lily Barsotti, Gladys Euchler, Catherine McKendrick, Claire Reilly, Pauline Zakotnik, Marie Smith, Bernice Ballenger, Dorothy Cohen, Mildred Ross. Mildred Richardson; Mrs. R. Quinn, Mrs. A. Tacchi, Mrs. C. Bollazzi, Mrs. E. R. Blaylock, Nellie Noshkin, LaVona Noshkin, Mrs. P. O'Connor, Mrs. R. Emerson, Mrs. Ed. Smith, Riya Zolotova, Mrs. G. R. Augustien, Mrs. R. Foppiano, Mrs. B. Domenici, Mrs. E. Brown.

Service Pins For Red Cross Workers

Service pins have been awarded to twenty-eight women of San Mateo county for service in American Red Cross work during the past three months, according to a report made public by Miss Helen Percy Chesebrough, vice-chairman of San Mateo County Chapter American Red Cross. Each pin represents eighteen hours of service.

SURVEY ROUTES TO DUMBARTON SPAN

The difficulty of many motorists in finding the correct roads leading to and from the Dumbarton bridge has led the tourist bureau of the Pacific Coast Automobile Association to survey the routes. It has issued the following directions to motorists:

San Francisco motorists desiring to cross the bridge will find the best approach to it on the west side. This is about a mile and a half south of Redwood City. The road is paved throughout, and all turns are clearly marked with the Dumbarton red and orange directional arrows.

Approaching from the south, enter Palo Alto down the main street, following this to Middlefield road, where all turns will be clearly marked. This road is paved and in good condition.

Motorists goins to Oakland or points east will, after leaving the bridge, continue over good paved roads through Newark, Centerville and on to Niles, thence left to Haywards and into Oakland. Oakland travel previously turned left at Centerville onto the Alvarado-San Lorenzo road. but this road is now temporarily closed for repaving. Those going to Livermore, Stockton, Sacramento or San Joaquin Valley points will continue from Niles through Niles canyon—a seven mile strip of good gravel road, to the town of Sunol, where good paved roads lead to all points east and south.

DALY CITY M. E. CHURCH

A fellow pastor with whom I am acquainted, a man who is having remarkable success as pastor of the First Baptist church of Salem, Oregon, Dr. Ernest Shanks, wrote this delightful poem:

When I kneel at night to pray,
How fine it is, if I can say,
Lord, I have wronged no soul this day.

If I have erred in thought or deed,
If I have passed a brother's need,
Show me the right, I only plead.

Give me the courage, Lord, to do
The thing I ought to carry through,
That to my task I may be true.

Then I will rise, tomorrow morn,
The good to face, the wrong to scorn
With strength and faith new born.

That day by day as I on press,
I may find happiness, success,
Bound up in friendships I possess.

A little child, and aged saint,
His burdens shared without complaint,
By love's own sweet constraint.

The Disciples, looking upon the earthly life of our Lord, seeing day after day His power over life and death, found that all of our Master's success was due to His remarkable ability to pray. And the plea of the Disciples burns into our very hearts as we hear them say, "Lord, teach us to pray."

May we learn to pray, but remembering always that prayer is a search for God, rather than a search for gifts.

The Sunday school is going forward and from the looks of things it will reach the 100 mark before Conference, which is September 14.

The congregations have been exceptionally large for the summer time and now that the vacation period is over, it is expected that we will have "Standing Room Only."

The church fiscal year ends this month, and the new year begins with September 1. We have had a good year, but we are looking forward to bigger and better things for the new year. We are looking forward to a prayer meeting hour each Wednesday night, and several other important events. We need your help in making our programs a success.

We invite you to attend a live, wide awake young people's meeting each Sunday evening at 7 o'clock, and then to stay to the church service at 8 o'clock.

ELLIOTT L. FISHER, Pastor.

BUILDING PERMITS ON THE INCREASE

The following building permits were issued by City Clerk B. C. Ross during the past week:

Horace Fellows, 336 Winchester street, four rooms.

H. Kushing, 501 Templeton avenue, five rooms; 515 Templeton avenue, five rooms.

J. S. Taggart, 247 Knowles avenue, two room addition.

D. Plansky, 61 Los Banos avenue, four rooms.

Louis Pezzola, 156 Miriam street, garage.

M. Fisher, 1020 Brunswick street, garage.

Paul Duerner, 345 Niantic avenue, four rooms.

Fred Peterson, 23 Woodrow street, four rooms.

Jefferson Union High School, pump house.

NEW APPLICANTS SEEKING PERMIT TO BRIDGE BAY

Application for permission to construct a $35,000,000 bridge from Candlestick Point, near South San Francisco, to the foot of Webseter street, Alameda, was presented to the San Mateo county supervisors at Redwood City last Monday by R. W. Thompson, of New York, who informed the board that the proposed bridge is sponsored by Colonel George W. Goethals of Panama Canal fame, and by Dr. Gustav Lindenthal, noted bridge authority of New York.

Mr. Thompson said that the bridge would be erected in three years after the granting of the permit, and that it would be designed to carry street cars, railroad trains and motor vehicles, and that it would be approximately eight miles in length.

The proposal was taken under advisement by the supervisors, and a decision will be rendered at a future meeting.

Farrar & Carlin, San Francisco contractors, were announced as the successful bidders for raising of the grade of the Bay Shore road between San Bruno and South San Francisco. The amount of the bid, given on a basis of cubic yards of material used, had not been determined by County Engineer George Kneese, but it was stated that the bid of Farrar & Carlin was the lowest on an item for item basis.

TRADE EXPOSITION TO BE COLORFUL EVENT

Arrangements are well advanced for the Pacific Foreign Trade and Travel Exposition, to be held in the San Francisco Civic Auditorium from November 11 to 20, according to an announcement made yesterday by William D'Egilbert, director general of the exposition. The exposition will feature displays of commodities and manufactures entering into the world trade of California and contiguous domestic and international markets. It will also emphasize the importance of Pacific travel to and from Hawaii, Canada, the Antipodes, Asia, the United States and all the South American countries.

"At the exposition," declares Mr. D'Egilbert, "manufacturers and exporters and importers of the United States will make representative exhibits. All other countries are being invited to participate, and inquiries are already coming in from Canada, Mexico, South America and Europe.

"Steamship companies and travel agencies are to feature models of modern liners making San Francisco a port of call; transcontinental railroads are arranging attractive exhibits of their de luxe modes of travel; and there will be photographic displays representing the color and life of travel abroad.

"Among the unique exhibits will be special sections devoted to radio transmission, phototelegraphy, submarine telephone transmission, ocean navigation contrivances, commercial aviation, cinema production, together with highly interesting mechanical and engineering devices, bringing the results of successful inventions before the visitors.

"An original scheme of decoration will prevail throughout the exposition, making it notable as an artistic achievement."

DRIVERS MUST WATCH ACTIONS OF CHILDREN

An 8-year-old boy, playing in the street with a coaster wagon, is likely to cross in front of an automobile, and a driver must appreciate this fact.

Thus ruled the Supreme Court of the State of Washington in a recent case wherein a driver was sued for hospital bills which were the result of injuries received by a child playing in the street.

Drivers are always charged with the duty of watching out for the actions of children, according to the safety bureau of the National Automobile Club. A small child has no knowledge whatsoever of traffic regulations, and will often make an inconsistent move which may lead him directly into the path of an approaching vehicle. Every automobile driver should keep this in mind and be constantly on the lookout.

BOXING RECEIPTS ADD TO STATE'S REVENUE

Although attendance at the prize fights in California during July of this year showed a small falling off as compared with the same month last year, the receipts increased from $232,227 to $245,349, according to the monthly statement given out by Walter Yarwood, secretary of the State Athletic Commission. The attendance figures were 162,237 and 152,250 respectively. Of these 26,905 last month attended American Legion bouts.

ASSIGNS NUMBERS TO GRADE CROSSINGS

The Transportation Division of the Engineering Department of the Railroad Commission is now completing the task of assigning numbers to all railroad grade crossings throughout the state of California, for the purpose of facilitating the identification of grade crossings by the public and the commission, in the efforts of the latter to render all crossings as safe as existing conditions will permit.

There are approximately 15,000 grade crossings in California, and elimination of all these crossings by grade separations would impose a staggering bruden upon the public authorities and the railroad companies. These railroad commissions, however, is constantly engaged in inspecting railroad crossings, and in ordering improvements in their protections. In line with this policy the railroad commission recently issued a general order fixing improved standards of grade crossing protection and gave the railroad companies a definite period of time in which to bring up the crossing protection devices at all crossings to the new standards fixed by the commission. A feature of this general order was the requirement that all crossings should be given an official number, which shall be painted in a conspicuous place on the warning device at each crossing. The assignment of these numbers is now virtually completed, and it is expected that the numbers will be placed at every crossing by the railroad companies within the next few months.

The numbering of all crossings is expected to prove a great convenience to the public as a means of positively identifying crossings in regard to which complaint is made to the commission, or to the railroad companies. Much confusion has existed in the past because of faulty description of the crossings in complaints of that nature.

NOTICE TO CREDITORS

In the Superior Court of the State of California, in and for the County of San Mateo.

In the Matter of the Estate of Jennie McKay, Deceased.

Notice is hereby given by the undersigned executrix of the Last Will and Testament of Jennie McKay, deceased, to the creditors of and all persons having claims against the said deceased, to file them, with the necessary vouchers, in the office of the Clerk of the Superior Court of the State of California, in and for the County of San Mateo, or to exhibit the same, with the necessary vouchers, within four (4) months after the first publication of this notice, to the said executrix, at the office of the Daly City Record, 6500 Mission Street, Daly City, California, the same being the place for the transaction of the business of said estate in the County of San Mateo, State of California.

Dated this 21st day of July, A. D. 1927.

DELIA HANSON.

Executrix of the Last Will and Testament of Jennie McKay, Deceased.

W. H. Clay, Attorney for Executrix, 603 Pacific Building, San Francisco.

IMPORTANCE OF SERVICE

Recent statistics show that at the end of the year 1926 telephone investments in the United States totaled $3,300,000,000, representing 60 per cent of the telephones in the entire world.

With a land area consisting of a small fraction of the world, the United States has actually over half of the telephone communicating systems.

Since the days of Rome and Carthage, power and prosperity have come to those who have intelligence to develop efficient tools to work with.

The telephone is one of the most essential tools of progress and business. It is difficult to realize what would be the result should its scope be limited. A man sitting in his office is now in touch with the entire nation. Fifty years ago he was in active communication with only his office force. Now the most important deals can be closed during a few minutes telephone conversation with cities thousands of miles away, instead of waiting weeks for slow, uncertain mails. Without the telephone, business would be checked in a second from the rapid, efficient thing it is today, to the slow march of yesterday.

The universal service rendered by the American telephone system, is the greatest argument against the shouters of "Trust" every time companies merge for the sake of increasing efficiency and greater service to the public.

The American telephone system has amply justified its size by fair dealing and benefits to its patrons. It has built its business by progressive methods and reasonable profits.

President Coolidge's visit to the geysers in Yellowstone Park will enable him to make comparisons with the "Old Faithfuls" in Congress.

Besides being a notable feat, the Smith-Bronte flight to Honolulu served to inform the world that there is such a thing as a jaiwe tree.

THE CRIPPLED KID

By Wesley Strong

I can hear his little crutches go,
Down through the street
And at eve when the workers homeward flow,
Their little sound repeat.

Totterin', wondering, ever trodding on,
Through life sadly limps.
Tho' sad and painful, happy is his song,
No sigh the cripple kiddie whimps!

Totterin', singing, life is like the flower,
Lost upon a window sill;
Growing sweeter, and as it grows every hour
Like the hyacinth upon the hill.

Copyright 1927.

FOURTH RADIO SHOW TO OPEN AUGUST 20

The fourth annual Pacific Radio Show will put California on the map in terms of radio in a way that no other show of its kind has ever attempted, according to plans disclosed by the Pacific Radio Trade Association, under whose auspices the big exhibit will be held in the auditorium in San Francisco, August 20 to 27.

Arrangements have been effected for the simultaneous broadcasting of the show programs nightly over stations scattered from Los Angeles to Seattle. This will be done from a glass enclosed broadcasting studio situated on the stage in the auditorium with all of the operations of the broadcasting and control rooms in full view of the audience.

Through the co-operation of the broadcasting stations around the bay the radio public will have an opportunity to meet personally many radio stars of note. These will broadcast from the show studio and show visitors are to be permitted to meet the unseen artists of the air who entertain vast audiences nightly through the medium of the genie "radio."

The show will be an example of the latest refinements and improvements in the products of America's youngest industry—radio. Scores of manufacturers of radio receiving sets and accessories will be represented.

A feature of the show is to be a several day gathering of radio dealers from all sections of the state. Plans have been completed for the decoration of Market street from the ferry to the civic center in honor of these visitors. There will be special illumination of the city hall and auditorium for the event. Plans also calls for the elaborate decoration and interior illumination of the auditorium.

INCREASE OF ANIMALS IS SHOWN BY CENSUS

Brown bears, 46,000 of them, were found by a recent census taking in the National Forests of the United States.

Deer, however, are the most numerous animals in the national forests. It is estimated that there are more than 600,000 of them. Their population has increased about 55,000 in a year. Next in estimated population are the elks of which there are 72,000, representing an increase of 19,500 over the previous year.

Although the extension of motor roads has assisted hunters in reaching game, it is pointed out that of the ten leading species in the 160 national forests, only two show a decrease in number compared to the last estimate. In some instances where elks have been "planted," the increase has been so rapid that it has been necessary to announce a special open season. In Utah and South Dakota this was the case.

SCHOOLBOY'S IDEA OF A GOOSE

The goose is a slow, low, heavy set bird composed mostly of feathers. His head sits on one end and he sits on the other. He cannot sing much on account of the moisture in which he lives. There ain't no space between his toes and he carries a toy balloon in his stomach so he won't sink. A goose has two legs and they are set so far back on his running gears that they came pretty near missing his body. If I was a goose I would rather be a gander.

ABOUT WOMEN

Miss Jeanne Livingston of Wyoming and Mrs. Afton Seal of Chico are the only practicing oil geologists in the world.

Miss Ruby E. Hamilton of Toronto, assistant director of field nursing for the Ontario Red Cross, has won the 1928 prize scholarship in international public health nursing at the University of London, which she will enter next month.

Miss Kate Martin of Cranbrook, B. C., broke the world's record for women in the 50-yard dash, which she made in five and four-fifths seconds. An effort is being made to have her record officially recognized.

Miss Kathleen Hoahling, 23-year-old Chinese young woman, is the first woman of her race to pass the final law examinations in London. She expects to practice in Singapore.

Miss Mary G. Lacy of the Department of Agriculture at Washington has compiled an index of developments in agriculture from 400 B. C. to the present.

Miss Jeanette Dincin, aged 23, of Brooklyn, recently married the famed Belgian violinist, Eugene Ysaye, aged 69, with whom she formerly studied.

Dr. Mary Pierson Eddy, well known missionary, was the first woman ever licensed to practice medicine in Turkey.

Bobbed haired women in Zerbau, Silesia, are subject to a special municipal tax.

Mrs. Charles F. George, of Cleveland, who was seriously injured in an automobile accident in which her husband was killed, was taken to his funeral on a cot in an ambulance.

Women of Virginia will place wreaths on the grave of George Washington's mother at Fredericksburg, Va., on August 25, the 138th anniversary of her death.

Mrs. Richcard Norton is manager of the New Gallery, one of London's finest moving picture theatres.

Mrs. Eugene Overton, California society woman, will pilot her ship, the Dwyn Won, on a cruise to the South Seas.

BOYS AND GIRLS

Eluah Purdy, high school girl of LaPorte, Ia., in four years has driven 14,000 miles to attend school without having been absent or tardy.

Virginia Salgado, 15, of Toluca, Mexico, won the intermediate Christian Endeavor "sharpshooting" contest at Cleavland, although the questions had to be translated for her.

Baby Mary Lou Hart of Los Angeles was recently photographed with her mother, her two grandmothers and her four great-grandmothers.

Guardianship of Princilla Moran, 8-year-old orphan movie actress, is being sought by one group of relatives and two groups of friends. She is said to earn $300 a week.

Leona Naramore, 14, of Wilson Dam, near Florence, Ala., has rescued four persons from drowning and is being considered for a Carnegie hero medal.

Jane Eads a young Chicago girl, was the first passenger to make the trip from Chicago to San Francisco on the newly established air passenger line between those cities.

Dorothy Johnson, 4-year-old piano prodigy of Honolulu, plays thirty classical selections which she has learned by ear.

George Noffsinger, Jr., is an expert broncho buster and guide at Glacier National Park at the age of 13.

Jeanne Malveur, 4-year-old girl of Calais, France, was carried five miles to sea in a tub in which she was playing near the beach, but was finally rescued.

School children of St. Johns, Mich., deposited $5,557.63 under the school savings plan last year, although the total enrollment was only about 850.

Lloyd Barrett, aged 12, of Washington, D. C., was selected as best typifying American youth for qualities of honesty, helpfulness, industry and thrift.

Anne Stockford, a little London girl injured in a riding school accident, has attracted the attention of King George, who often stops to chat with her while taking his morning ride.

PRIMITIVE PASSIONS

Lora: "This is a clever little confession story you have written, but why did you name the man Adam?"

Dora: "The editor wanted it written in the first person."

Congressional blocs are lining up again, and we may expect to witness a conference of bloc heads.

It begins to look as though the naval holiday is to be limited to an occasional Saturday off.

NOTES OF INTEREST FROM ALL CORNERS

Canoes and rowboats are now being made of compressed paper in Germany.

An animal breeder in Olympia, Washington, is said to have developed a dog that can not bark.

Using gas for heating and electricity for power and lighting, many modern factories are now built without smokestacks.

Single lights or groups of lights of a street system may be turned on or off by means of a radio control wave.

A railway tunnel in France is fitted with vacuum cleaners and brushes which clean the cars as they pass through.

A method of testing the quality of diamonds by uatra-violet light rays has been perfected in France.

The original painting "The Spirit of '76" was painted in the Centennial year, 1876.

Massachusetts was the first state to adopt a compulsory education law.

The Vatican at Rome, home of the Pope, is the largest residence in the world.

The "Pine Tree" shilling is said to have been the first coin made in the United States.

The rarest United States coin is the $20 gold piece of 1849, only one of which is known to exist.

In France there is an underground canal in which boats travel more than four miles under a mountain.

Canada deported 1,470 persons to countries overseas last year.

Platinum deposits have recently been discovered in Africa.

Complainging of their hard lot, professional clowns in Paris have formed a union.

The Dowager Coountess of Jersey has an even 100 living first cousins.

Six hours of sleep in a soft bed will rebuild as much mental energy as eight hours in a hard bed, according to an expert.

Waterproof paper is being used in making raincoats, school bags, beach slippers, kitchen aprons and a variety of other useful articles.

Liquid oxygen for use by aviators in altitude flights is contained in a new vacuum bottle invented in France

An improved variety of flax, which it is believed will reduce the cost of linen, is being tested in Ireland.

The rate of speed at which blood passes through the body can be measured by means devised by doctors at the Boston City Hospital.

A dog owned by scientists at Northwestern University has lived for more than two years with its stomach removed.

Under a British law enacted in 1360, eavesdropping is punishable as a crime.

The idea of a slot-machine telephone was conceived by an undertaker.

President Calles of Mexico and three members of his cabinet are Masons.

Americans own about seven times as many automobiles as all the rest of the world combined.

Coffee, beer, wine and sandwiches are served on some of Vienna's street cars.

A prism used by Sir Isaac Newton in his experiments has been acquired by the British Museum.

When arrested for theft, a Colorado culprit was found wearing his victim's teeth.

Mounted police of London are equipped with first aid dressings and are instructed in their use.

John Davies won a horseshoeing medal at Bath, Eng., at the age of 75.

A new German airplane with a motor of only 12 horsepower is capable of carrying two persons.

Snake skin, treated by a process which makes it soft as silk, is being used for making handbags, umbrellas and hats.

Among the conveniences included in a new French liner are a 60-car garage, a sidewalk cafe, a chapel and a 30-foot bar.

A powerful lamp has been developed for detecting forgeries or alterations in checks or other valuable documents.

Pictures may be enlarged by a new German elastic photographic film, which can be stretched to ten times the original size and then dried on a glass plate.

Thread three times as strong as cotton is made from fibre of the Mexican magui tree.

An Englishman has patented a process for rendering rayon and other nitro-cellulose fabrics fireproof.

A pneumatic pad for use by cripples is worn between the crutch and armpit, giving increased comfort.

RADIO

Beware of Poor Neutralization

Squeals and Poor Quality Among Ills of Maladjustment.

A neutralized receiver, unless it is carefully adjusted, can be less efficient than one in which neutralization is not employed. There are three chief ills of improper neutralization, according to an article in the Radio Broadcast Magazine.

"The first and most obvious manifestation of incorrect adjustment of the neutralizing device is oscillation in some or all of the radio-frequency circuits," reads this article. "These oscillations, as a general rule, become more severe as the frequency is increased, and a loud squeal or whistle will be heard as the tuning controls are adjusted to receive some station that is transmitting.

"Such an effect will make it difficult for the user of the receiver to obtain satisfactory reception and the oscillations will be radiated from the antenna attached to the receiver and cause interference on other receivers located in the neighborhood. Such oscillations can be prevented by correct adjustment, and it is essential that the proper setting be determined in order to make it possible to obtain best results from the receiver.

"A second detrimental effect of maladjustment of the neutralizers is poor quality, which is generally due to the existence of too much regeneration. The quality, under these conditions, will generally sound drummy, indicating that the various frequencies in the carrier are being unequally amplified by the radio-frequency amplifiers. To preserve good quality, the radio-frequency amplifiers must amplify without distortion a band of frequencies extending about 5,000 cycles above and 5,000 cycles below the carrier frequency, and this condition does not exist unless proper neutralization is obtained.

"Another effect of improper neutralization," says Radio Broadcast, "is to cause one or more of the tuned circuits in a single-control receiver to be thrown out of synchronism so that the set loses a great deal of its sensitivity, and as a result it is not possible to tune-in distant stations with satisfactory volume. These three major effects of improper neutralization indicate how essential it is that neutralization be always carefully and completely accomplished."

May Teach English by Radio to Filipinos

Radio may solve the long-standing problem of a common language, which is of first importance to Filipinos and to the United States. From the inception of the American regime English has been put forward in the schools and in the press to be the people's common language—since they speak some 67 Malay dialects with sharp distinctions, making it impossible for people even of adjacent provinces to converse. But the native tongue does not accommodate itself to English readily; few American teachers are left in the schools and the native teachers are, for the most part, ill prepared in English, so the results of their instruction are discouraging. The children recite glibly enough, but in a strange gibberish, not English. But the Radio Corporation of the Philippines recently broadcast a lesson in English diction which proved that Filipinos can acquire English by radio.

Battery Clamp Used for Skinning Hook-up Wire

In using the popular rubber-covered stranded hook-up wire, radio constructors usually experience considerable trouble in skinning the ends for connections. A simple tool which is very convenient for this work can be made from an ordinary large battery-connection clamp, which resembles an overgrown tie-clasp. Merely file the jaws of the clamp smooth, and then cut in them, with a three-cornered file, a notch which is roughly the size of the wire.

To use the tool, simply close the jaws over the wire to be skinned, squeeze with the fingers and at the same time pull outward toward the wire's end. The edges of the notch will pare the rubber insulation off neatly without cutting any of the fine strands of wire.

Cleaning Radio Panels Very Simple Operation

Take a bit of cheese cloth and wet it thoroughly in water. Wring out all of the water and shake on a few drops of alcohol (any kind of alcohol will do). Now wipe the panel with this cloth and the dirt and every fingerprint and every foreign substance will come off as it by magic. Wipe dry with soft cloth or chamois and the job is done.

Precaution: Be sure that this alcohol rag does not come into contact with any of the woodwork. Alcohol will tend to remove the varnish and spoil the finish on the wood. Used in the manner prescribed, it is excellent for the bakelite panel.

Radio Aids Operation of Inland River Craft

It is generally known that radio has transformed the art of navigation upon the high seas. This science is also coming into its own as an aid to the operation of craft upon inland rivers.

Maj. W. W. Parker, chief clerk of the American Engineers' office, Cincinnati, originated broadcasting of river stage reports over station WLW?

In response to a circular letter sent out by Major Parker recently to test the value of this service, the lockmasters and transportation companies operating Ohio river craft have given enthusiastic indorsement of the value received from this service.

River stage reports are broadcast each morning and are picked up by the lockmasters and boat captains along the Ohio river and its tributaries from a point a few miles south of Pittsburgh to Cairo, Ill. Lockmasters find this service extremely valuable. All of the fifty dams along the Ohio are movable and the reports of the rising and falling of the river enable the lockmasters to know when to raise and when to lower the dam. The dams are made of wicket, a device invented by a Frenchman and tried out in the Ohio river for the first time at Davis island dam, seven miles below Pittsburgh, in 1879. When all of the wicket sections are in position they form a barrier. When the river is rising, the dam tender goes out in a maneuvering boat, equipped with a derrick, and lowers each section to the bottom of the river, and the traffic goes over the dam instead of through the locks.

As for the steamboat captains, the reports enable them to determine the stage at which they must navigate, and to know when they will go through locks and when they will go over the dam. They can sit in their cabins and compare the river stage reports with the draft of their boats, which tells them what precautions they must take to steer to the channel.

Many Ohio river craft tow a large number of barges of coal. It is difficult to maneuver such a tow under the best conditions. In the absence of accurate information as to river stages, the craft may be caught on a sandbar for a week or two.

The promptness of the radio information is especially appreciated by river men, as they receive the broadcasting, in many cases, several hours ahead of the printed report.

Some of the companies operating river craft have equipped all of their boats with receiving sets as the result of the river stage broadcast. Many large shippers have attested to the value of this service.

Varieties of Troubles That Cause Interference

Outside sources of interference which affect reception in a receiver are listed as follows:

Sign flashers.
Induction coils.
X-ray machines.
Static machines.
Telephone ringers.
Atmospheric static.
Electric street cars.
Defective transformer.
Regenerative receivers.
Bad contact in switches.
Amateur wireless station.
Static produced by belts.
Loose street lamp in socket.
Smoke or dust precipitators.
Defective street light rectifiers.
Electrical manufacturing processes.
Commercial wireless (code) station.
Leaking insulators on power circuits.
Overlapping of broadcasting stations.
Motion picture machines using arc lamp.
Induction from high potential circuits.
Heterodyning of broadcasting stations.
Defective rail bends on street railway systems.
Defective lightning arresters—power circuits.
Motors and generators of the commutator type.
Arcing wires in trees and other grounded objects.

How Sun Determines Volume on Long Waves

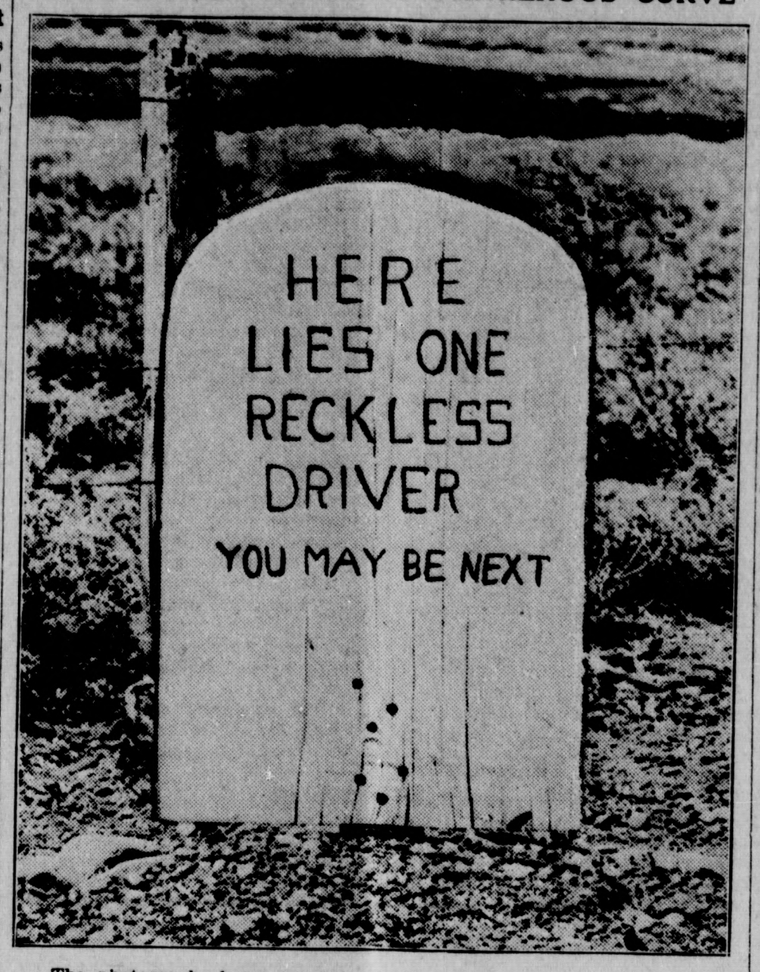
That the sun's activity is probably the chief factor in determining the strength of long-wave radio signals was the most important conclusion in the annual report of the laboratory for special radio transmission research prepared by Dr. L. W. Austin, of the bureau of standards.

In addition to the curves and tables showing the routine measurements of the laboratory, curves were shown in the report which indicate a close relationship between the long-wave signal strength and the changes in number of sun spots during the eleven-year sun-spot cycle, the signals increasing in strength with the increase of sun spots.

Other curves given show periodic changes in the signals during the time of the sun's rotation (twenty-six days), while others indicate a nine-day period in the case of certain stations.

Some of these curves also suggest fixed active areas on the sun, which often produce increase in signal strength when they face the earth. These periodic relationships, however, are not considered as well established as the relationship of the monthly and yearly averages of sun spots and signals extending over a number of years.

QUEER SIGN WARNS OF DANGEROUS CURVE



The photograph shows an unusual sign which has been erected on a dangerous curve of a mountain highway near Truckee, Calif., where several fatal automobile accidents have happened. The warning sign was erected by a driver who narrowly escaped death as the result of the reckless driving of another motorist.

GIVE CLOSED CAR REGULAR WASHING

Finish of Many Cars Dulled and Scratched by Careless Washer.

A closed car does not collect any more dust and dirt than an open model, but it looks much worse if it is not cleaned regularly. Considering the great increase in the popularity of closed cars, automobile cleanliness is today more important than ever.

Although some manufacturers give special instructions for washing the finish of their cars, a thorough knowledge of correct washing principles is desirous for every car owner.

It's Simple, but—

Washing an automobile is simple, yet the finish of many a car has been dulled and scratched by carelessness in washing. Never wipe off the dust or mud without first flushing off the car body with a stream of water. The water removes much of the foreign matter so that it cannot scratch the finish in later washing operations.

After flushing, go over the body with a sponge and a stream of water. Be sure that the water runs freely through the sponge to carry away the dirt. Wash the sponge frequently, and use it gently. Very cold or very hot water should not be used—a lukewarm temperature is best.

After the washing operation, a soft cloth or chamois should be used to dry the finish. Then a good body polish should be applied with a soft cloth or chamois.

Rancid butter is an effective agent for removing spots from the finish, as is kerosene. Do not polish the nickel parts too often, as frequent rubbing with a polish tends to remove the plating. A good silver polish is the best thing to use on nickel, but generally the nickel can be kept bright by rubbing it with an oily rag. Remember to take particular pains in washing a new car, because the varnish and paint require time to season and are more easily injured than on an older car.

Removing Grease and Oil.

To remove grease and oil, apply gasoline to the parts on a soft cloth. Mud and grease on axles and under the fenders can easily be removed by washing with suds made by dissolving two pounds of soap in a gallon of water. It is best to rinse the washed parts thoroughly.

Texas Farmers Now Own Largest Number of Cars

Corn-belt states which for a number of years held the motor supremacy of the country are now struggling with the South for these laurels. Texas in 1926 heads the list of states having the most cars on farms, while Iowa is in fourth place. The figures are 285,276 and 229,000 respectively. While Iowa, Nebraska and Kansas were crowding the top rungs in respect to the number of cars in proportion to population, here the South and Far West are coming to the forefront. Iowa ranks second in this rating with California taking first honors and Florida coming into third place. Nebraska and Kansas rank sixth and seventh. The shift in the position of the corn-belt states is not due to lack of progress, because the numerical increases in registration have continued. Other states, however, which did not get started as early, are now rushing to the fore.

Whitewash Applied to Catch Auto Thief

At last we have the solution to the problem of catching automobile thieves.

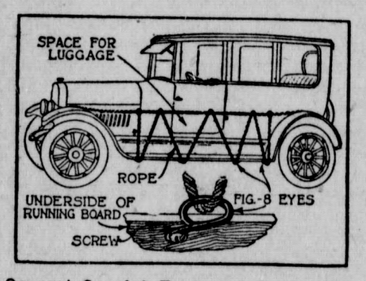
It's offered gratis to all police departments of the world by former Inspector C. Turner, of the London police. Here it is:

Have handy in each police station pails of whitewash and syringes. When a car is reported stolen, distribute the whitewash equipment at the important outposts of the town and when the stolen car is spied, an officer at each side of the road sprays the machine with his whitewash.

It's sure to be identified easily and stopped at the next crossroads.

Carry Bulky Luggage on Running Board of Auto

You can lash considerable bulky luggage to the running board of your car by the use of a rope arranged as shown in the illustration. The eyes should be bent up from an iron rod at least one quarter inch in diameter. By loosening the screws, the eyes can be turned under the running board when not in use.—Popular Science Monthly.



Several Special Eyes and Some Rope Arranged in This Way Will Hold Considerable Luggage.

AUTOMOBILE HINTS

Getting down to brass tacks is all right for anybody but the motorist.

* * *

Sixty American railroads now use motor trucks as part of shipping service.

* * *

More than 15,000 schools in this country have motor bus transportation for pupils.

* * *

Children should be taught never to play around automobiles or to touch any of the levers.

* * *

Recent investigation shows that the most dangerous traffic hour of the day is between 5 and 6 p. m.

* * *

Throughout the United States there are 51,715 public garages and 83,758 service stations and repair shops.

* * *

Barney Oldfield, who has driven in more races than any other living driver, was the first man to make 60 miles an hour in an auto.

* * *

Motorists who own closed cars should warn their passengers not to lean against the doors. The owner is responsible for the safety of his passengers.

* * *

A motorist suggests that a list of Safety-First hints for pedestrians should be displayed on all cars. Placed under the chassis they could be read as the traffic passes over you.

Golden State
News of Interest to All

California has increased her automobiles forty times in sixteen years—from 40,000 to 1,600,000 motor vehicles.

Tia Juana, picturesque resort town just across the international boundary, was visited by a devastating fire last week. An entire block in the center of the business section, including a dozen saloons, cafes and dance halls were destroyed, with a loss estimated at $500,000.

The supervisors were requested by the board of public works to issue an immediate call for bids for construction of the $225,000 Paul Revere School annex at Folsom street and Tompkins avenue, San Francisco. The new building will contain 16 classrooms and a kindengarten and will be of modern concrete construction.

Disbursements of Sacramento County during the month of July amounted to $827,480.94, as contrasted with receipts of only $161,258.73, the regular monthly report compiled by County Treasurer Frank P. Christophel reveals. In spite of the overwhelming preponderance of disbursements over receipts, the cash balance in the county treasury at the close of the month was $1,159,279.56.

Four caravans of realty men from various parts of the State are planned for the Santa Monica convention in October, it was announced by Cliff Clegg, Los Angeles broker, who will act as grand marshal. The first caravan will be from San Francisco, another from Sacramento, the third from San Bernardino and Riverside counties and the last one from San Diego. It is planned to have all four arrive in Santa Monica at the same time.

Collections under the State gasoline tax for the quarter ending June 30 totaled $5,352,595, over $500,000 more than in any previous quarter, according to announcement of the State Board of Equalization. The statement revealed that 270,333,079 gallons of gasoline were sold during that period, the increased amount being due in part, the board declared, to the price war engaged in by the oil companies during the spring months.

Rio Nido, one of the best known summer resorts on the Russian River was sold last week by its owners, W. S. Smith and Harold Smith, for $200,000, it was announced. Dr. Roscoe E. Hamlin, local physician; his brother, Edward Hamlin of Oakland, and Captain Duncan E. Smith, former British aviator, are the new owners. The resort consists of over a hundred acres of timber land, a hotel, a number of cottages and a stretch of beach.

Declaring that she was falsely arrested and forced to ride to jail in "a common patrol wagon," Miss Mae Burch filed suit for $50,000 in Superior Court last week against Ross E. Stone. Miss Burch was arrested on a charge of converting an automobile to her own use on June 3 of this year on a warrant sworn to by Stone. She declared that she had to appear five times before Police Judge Golden and that the case against her was finally dismissed.

Involving one of the biggest land deals in Kern county, the Honolulu Oil Company has purchased from Miller & Lux, Inc., approximately 910 acres of land in the Buena Vista field, thirty miles southwest of this city, it was revealed last week by the filing of a deed to the fee title. The deal is subject to an oil lease held by the Shell company, stated the agreement. Under an agreement made in January, 1926, the Shell company acquired the right to prospect the area for oil, the holding being portion of a 140,000-acre lease.

Beginning this week, produce dealers throughout California will operate under a license issued by bill passed by the last legislature, the state department of agriculture. This is in accordance with law under which produce dealers are regulated. Under the act every person, firm, exchange or association whose business consists of receiving farm products for sale on a commission basis must be licensed and bonded. This will be under the direct supervision of the division of markets of the department.

California's industrial growth in the past decade or so has been so phenomenal that the state now ranks eighth among the leading states of the nation in total value of manufactured products. The fact is revealed in a compilation of United States census data just completed by the California Development Association. The percentage of total United States production in respective lines represented by California's production are: Food products, 5.8; chemical products, 7.7; lumber products, 5.5; paper and printing, 3.8; machinery, 2.8; transportation equipment, 2.0; iron and steel products, 1.6; stone, clay and glass, 5.2.

J. M. Friedlander, State corporation commissioner, was minus $50 last week, after beinf fined by Justice Holbrook at San Bernardino for violation of the law prohibiting smoking in a national forest. He was arrested on the Arrowhead road in Waterman Canyon.

Steps are being taken by the industrial committee of the Stockton Chamber of Commerce to locate and assist in financing an aircraft manufacturing concern at the new Municipal Aviation Field, according to A. J. Zitlan, local banker and chairman of the committee.

More than 3,000 of California's 11,000 lawyers have responded to the first call of the State Bar Commission to register their names in accordance with the new law, according to Joseph J. Webb, member of the commission.

Dawn to day found the ground at Mount Shasta City covered with snow, and the mantle of white remained until the sun was well up. In all about an inch of snow fell during the night. Red Bluff at the same time experienced a light rainfall, which is "very unusual weather" for July in these parts.

Fire which broke out in the yards of the Santa Barbara Lumber Company last week caused damage estimated at $100,000 half an hour later and valiant efforts were made by the city fire department, aided by San Francisco delegates of the American Legion here in convention to stop its spread. The night had been one of stormy celebration in the city, American Legion delegations from many cities parading the streets and campaigning for convention votes and when the fire broke out the streets were crowded with merrymakers.

The first two buildings to be erected as a part of the University of California University plans for the Westwood Hills site, Los Angeles, will cost approximately $1,600,000, according to partially confirmed reports current in university circles this week. An estimated cost of $800,000 each has been placed on both the auditorium and library structures, the plans for which have been completed and bids are to be called between August 1 and 10.

A $150,000 bread plant will rise at the northwest corner of North Main street and Roe Drive, Santa Ana, ground for the establishment being broken this week by the Kilpatrick Baking Company. The new Kilpatrick plant, when completed will employ more than fifty men and will have an average pay roll of from $2500 to $3000 weekly. The building itself will be of Spanish architecture, finished in white stucco with red til roof, fireproof throughout, and will have 20,000 feet of floor space.

Bids were called for last week and final plans approved for a two-million dollar theatre to be built immediately on a site bounded by Market, Hayes and Polk streets, San Francisco by the Capital Company, a subsidiary of the Bank of Italy. William Fox has taken a 25-year lease on the theatre, which will have a seating capacity of 4,570 persons. The new playhouse which will be known as the Capital will be the equivalent of nine stories in height, and plans are so drawn that at some future time, nine additional stories may be built atop the theatre, and eighteen stories in the gore of Market and Larkin streets to house a thousand-room hotel.

Sixteen states will be represented at the 1927 annual Pacific Coast Dairy Show to be held in Oakland, November 14th to 19th, Robert E. Jones, secretary and manager of the show, San Diego, declared before the California Dairy Council meeting. There will be over 1,000 exhibits, he declared. Canada is taking an interest in the dairy situation and is to be represented at the show, Jones said.

The third annual show of the State Flower and Horticultural Exhibition will be held at Montebello on September 30 and October 1 and 2, according to the National Automobile Club. Because of the topography of Montebello, it is largely free from devastating winds and frosts, and for this reason has become the home of numerous nurseries and cut-flower growing organizations. Here are propagated and grown the stately and ornate boxwoods, coco palms, delicate Kentias and many other ornamental shrubs. Judges have been chosen from all parts of the State and each is an expert in this line. Prizes are to be awarded winners of each group of exhibits.

California flappers a few generations hence may be getting their silken stocckings right off the neighborhood mulberry bush. William Oliver Mills of Berkeley, a former silk manufacturer, expresses the belief, for instance, that this section of the country could raise all the raw silk needed by the entire United States. "Silk can be produced for $4.75 a pound on plantations in California," says Mills. "This is the cost of everything from raising the worm to selling the silk. The selling price of silk is now $7 a pound which allows for a large profit to the producer."

The local engineering department of the American Can Company is completing plans for a one and two-story reinforced concrete factory and warehouse building and a one-story frame and stucco office building. The structures are to be erected in the tract bounded by Ocean and Eardley avenues, Sloat boulevard and Dewey avenue, Pacific Grove, Monterey county. Plans are being prepared under the supervision of C. G. Preis, chief engineer of the company of New York. The improvements will cost about $600,000.

Five carloads of thoroughbred horses, valued at more than $1,000,000 and entered in California exhibits last week arrived from the East and Canada for the horse show to be held at Palo Alto August 8 to 13.

Kern county residents own 26,838 motor vehicles, of which 3,891 are trucks, and 177 motorcycles, according to a compilation made by J. B. Best, manager, Bakersfield branch of the Automobile Club of Southern California. Of the 22,820 pleasure or business automobiles means one automobile for approximately every three inhabitants of the county.

PASSING OF GENERAL WOOD

This nation has lost a faithful servant and a typical American in the passing of Major General Leonard Wood, who died Sunday at Boston, following an operation to remove a tumor.

General Wood's body was laid to rest in Arlington cemetery, Washington, D. C., on Tuesday, with full military honors.

He had come to the United States from Manila, where he was located as governor general of the Philippines, and had called on President Coolidge at the "summer White House" in South Dakota. While in poor health, his friends had no reason to expect his untimely passing.

He had a spectacular career in the army, rising from a surgeon to an officer of the line, finally to chief of the staff, the highest post in the military command. His rapid advancement resulted in some measure from his intimate friendship with Theodore Roosevelt, with whom he served in the Spanish-American war.

His career was climaxed by his appointment as governor general of the Philippines, a position he held with distinction and credit at the time of his death in Boston.

Governor General Wood earned an enviable record as a citizen, surgeon, soldier, statesman, patriot, leader of men, inspirer of youth, guide, philosopher and friend of dependent peoples. This nation loses a faithful worker and the people of the Philippines are bereft of their best friend.

FLOOD CONTROL URGED

Senator Robinson of Arkansas has announced that he will introduce a bill at the next session of Congress with provisions for flood control. He has also expressed the opinion that an extra session of Congress should be called to study this problem and pass the second deficiency bill, which failed of passage in the Sixty-ninth Congress.

In regard to flood control, the Senator believes that a Federal corporation analogous to the War Finance Corporation should be created to take over the general work of rehabilitation and to co-ordinate the activities of existing organizations and to establish permanent measures for flodd prevention and control.

While he's out West, President Coolidge might win favor with Tammany by rigging himself up in Indian costume.

About the only successful farmers' "combine" is the new machine that does wheat harvesting in one operation.

Dominant Note

In our business creed the dominant note is unswerving devotion to a trust ... Our service is scientifically correct because it embodies everything known to our profession

AIRPLANE SAFETY

In the development of passenger air lines in the United States one of the greatest obstacles to be overcome is fear of accidents. While air travel in passenger planes has been comparatively free from casualties, the fatalities among military and stunt flyers have been so great as to give prospective passengers cause for alarm.

That safety in the air can be attained is well illustrated by the record of European passenger lines, particularly those of Germany. In 1925 and 1926 German passenger planes covered more than six million miles and carried approximately 85,000 passengers, with only one fatal accident in the two years.

These planes flew on schedule, even under unfavorable weather conditions, and afforded service between Germany and distant cities, including London, Paris, Madrid, Rome, Constantinople and Moscow, as well as intermediate points. During 1926 the regularity of schedules averaged 98 per cent.

With constant improvements being made which make for even greater safety there is no reason why entire confidence in air transportation should not be secured, provided pilots are selected and trained with greater care than has been done in America in the past.

Germany's success has been largely due to the exacting requirements demanded of pilots. There some of the most experienced and successful war aviators and stunt fliers have been refused licenses to pilot passenger planes, in which strict observance of safety rules is demanded, as well as courage and skill.

Through the same rigid requirements with respect to machines and personnel America can undoubtedly duplicate or excel the German record for safety.

MICROBES PRODUCE COPPER

Copper is ordinarily thought of as one of our most valuable metals won from the earth through the skill of the miner and made into usable form by the metallurgist; but according to a recent report of the Department of Interior, it now appears that metallic copper may be deposited—in relatively small quantities to be sure—through the action of bacteria.

During a survey of the region near Cooke, Montana, by the Geological Survey, spongy masses of native copper were found in the black muck of a bog. Several bodies of pyritic copper ore crop out about half a mile above the bog. This ore weathers rapidly, and the copper is removed from it in solution as cupric sulphate. Redeposition of the copper as native metal only in the black muck and in none of the gravels and sands in the vicinity was ample proof that something in the muck had caused the precipitation of metallic copper from the sulphate solution, but the identity of the precipitating agent remained to be determined. Consideration of inorganic processes was discouraging, but preliminary experiments with the copper-bearing muck led to more carefully controlled experiments which proved beyond question that the copper was precipitated through the agency of certain bacilli.

SAFETY CONSCIOUSNESS

To check the rapid growth of fires and industrial accidents, people must get the safety habit, or develop a "safety consciousness." Safety, like other things, is largely a matter of habit not only in industrial life but in all forms of activity.

The human element is the greatest single factor in fire and accident prevention. Safety engineering has gone far in recent years in the direction of mechanical safe-guarding, but no matter how great the factor of safety may be, mechanically considered, it can be neutralized if the machine or property is not properly handled. No one can do this for the worker, and his own self-interest should prompt him to develop a safety consciousness.

We suspect it was an ugly rumor that staged the first non-stop flight.

THE NEXT CONGRESS

Whether there shall be a special session before the Seventieth Congress regularly assembles in December or not, it appears that the stage is being set for one of the most strenuous sessions in recent years.

While it is conceded that one of the paramount issues to be considered is flood relief, other problems, old and new, will clamor for solution. Farm relief, tax reduction, national defense, Boulder dam and many other measures will be put forward, not forgetting the perennial controversy over Muscle Shoals.

An indication of the fierceness of the impending struggle over these measures may be seen in the renewed activity of the "farm bloc," whose leaders recently held a conference in St. Paul, where it was proposed to combine several issues in a sort of coalition program, whereby support for one bill is sought to be traded for support for another. For example, it is said that the middle west will support the Boulder dam bill and possibly government operation of Muscle Shoals in return for aid from advocates of these measures in support of the McNary-Haugen bill.

Even though such a coalition be agreed upon by the leaders concerned, whether they can actually deliver the votes in Congress in accordance with such an agreement remains to be seen. But whatever the line-up may be on the several important measures involved, it seems certain that the Sixty-ninth Congress will have nothing on the Seventieth as a fighting body when the record is finally written.

A GROWING INDUSTRY

Do you know that ten per cent of the weight of your automobile tires is composed of carbon black? Such is the case, according to a report by the Bureau of Mines, which tells of the remarkable growth of the carbon black industry.

Carbon black is a fluffy, velvety, black pigment, made by burning natural gas with insufficient air. Until twelve years ago it was used chiefly in the manufacture of printing ink and the output required was comparatively small. But in 1915 it was discovered that by combining carbon black with rubber the tensile strength of the rubber was much increased, adding greatly to its life when used in automobile tires.

After this discovery the use of carbon black increased with amazing rapidity, until now there are about 60 plants for its manufacture in the United States, with a total production of nearly 200,000,000 pounds a year.

While carbon black is used extensively as a pigment in inks and paints, in stove polish, crayons and a variety of other articles, fully two-thirds of the output goes into automobile tires.

Thus the development of another important industry has been brought about through the marvelous expansion of the automobile trade.

INTERNATIONAL RELIEF

Realizing the inadequacy and lack of organization of the means that now exist to cope with disasters, the League of Nations Council passed a resolution in December, 1926, which provided that a conference for the establishment of an International Relief Union for the relief of populations stricken by disaster be summoned.

This conference has framed a convention with statutes and a final act, and eleven nations have already signed the agreement under which the organization is formed. Each state will be required to contribute to the initial fund of the International Relief Union, but after that contributions will be voluntary.

It will operate in favor of any nation stricken by disaster, without distinction of race or nationality, or regard to political or religious considerations, although its activities will be limited to disasters that occur on the territories of members of the Union or are of a nature to affect those territories. Close co-operation with Red Cross Societies is expected. The Union will have its headquarters at the seat of the League of Nations, at Geneva.

COLLEGE EDUCATION

It is the opinion of Dr. Frank L. McVey, president of the University of Kentucky, that the poplarity of American college education, which is now drawing 850,000 young men and young women yearly to institutions of higher learning, is likely to go on increasing for twenty-five years.

He also declares that educators should make better known just what is the purpose of a college education, so that boys and girls who do not really want it will not crowd the class rooms, and also have the high schools throughout the country reorganize their systems so that the admission of the student into college would be more dependent upon the individual than upon the accredited standing of the high school.

Now it appears that England won't even agree to scrap her navy blueprints.

No one can deny that Lindbergh is a real hero, but he refuses to be a reel hero.

It appears that the present coal strike has a rather poor publicity department.

SELF SERVICE

Many good folks are lamenting the passing of the era when men and women consecrated their lives to unselfish service and prepared themselves to become ministers, missionaries, teachers or country doctors, that they might administer to the spiritual, mental and physical needs of humanity without thought of large worldly gain. They are not in error when they charge that modern men and women are choosing vocations today in which they can do the greatest service to themselves.

People today are coming to the belief that the best way they can help others is to produce much, that their profit shall be large and that they shall never become dependent upon society.

The old idea of service was direct. The new service is indirect. Twenty years ago it was still thought that only ministers, doctors and teachers served humanity. Today every workman who carries his whole day's wage home is known to have earned that wage in service to society.

Elbert Hubbard's version of the Golden Rule was, "Do unto others as though you were the others," but an even more up-to-date version is, "Do yourself much good and no bad to others."

Getting something for yourself is reprehensible only when it is gotten at the expense of another.

INTEREST IN AIR NAVIGATION

Since the daring flights by American aviators in recent months, the world is awakening to the possibilities of air navigation and an added interest is noticeable. In this country it is proposed that air ports be built in every large city and definite air routes established.

Recent information states that the Argentine congress has now under discussion a bill appropriating the sum of 3,780,000 pesos (the Argentine peso is worth about 42½ cents United States currency) to further aeronautical activities in that republic. The bill provides for training schools, airdromes, training machines, salaries, etc.

The Ministry of Public Works of the Czecho-Slovakian republic states that in the near future it will receive eight large passenger planes. The planes have been ordered and are designed for passenger traffic on state lines. They are capable of accommodating eight passengers and are equipped with two 450-horsepower motors of the Lorrain-Dietrich type.

Interest in aviation is on the increase, and perhaps in time the United States will have a satisfactory number of airplanes for protection in case of an attack by a foreign nation.

LINDY WRITES A NOTE

Among the many letters received in New York by Col. Lindbergh one morning recently was one from a boy in Boston, who wanted the aviator to fly over the hospital in which he is a patient.

The request appealed to Lindbergh, but as it could not be complied with he wrote the lad a note and sent it with a photograph by air mail. The note said:

"Dear Ned:

"I saw your letter today just before leaving on my tour of the country. I can't fly over the hospital in Boston where you are because it would be against the law, but in order not to disappoint you entirely I am sending you a picture of myself and the 'Spirit of St. Louis,' which you can show to the other boys and girls who are with you.

"I hope you will be well soon and that you can get back to your home in Spokane in time for the air races in September. There will be lots of aviators there and you can see them close up.

"With my best wishes,

"Charles A. Lindbergh."

And when he received that note and photograph it is easy to believe that Ned was the proudest boy in Boston.

BIG POSTAL FIGURES

Considerably more than one-fourth of the ordinary expenditures of the United States government are required for the operation of the Post Office Department, for which the last annual budget provided $757,960,115.

Ten years ago the amount appropriated for the postal service was only $324,833,728, or considerably less than one-half that required this year.

More than 300,000 persons are now employed, salaries being the principal item of expense. Railroad transportation of mails costs about $100,000,000 annually, while equipment and supplies require an expenditure of several millions, among the items being about 1,400 tons of twine, 3,500,000 yards of canvas for mail bags, 2,400,000 locks, more than 8,000,000 gallons of gasoline for motor vehicles and hundreds of tons of stationery.

Postal receipts fall many millions short of expenditures, owing to the great cost of the rural free delivery service and the handling of many tons of official mail which pays no postage.

Under the present postal law there are a number of glaring inconsistencies in rates, but it is likely that an effort will be made to adjust these by the next Congress. But whatever its faults, the United States postal service is not only the largest, but also the most efficient in the world.

Colma News Notes

Mr. and Mrs. J. T. Casey returned Monday from Gilroy Hot Springs, where they had spent several weeks.

Mrs. C. W. Wardwell left Monday for a vacation in Los Angeles. She will stay there for some time, visiting relatives.

Mr. and Mrs. J. Millett and family left Thursday on a motor trip to Portland. They expect to return next week.

Mrs. Beatrice Batz, of M. Belli & Co., returned last Monday after a two weeks vacation spent in Los Angeles and other Southern California cities.

Colma's two schools, Jefferson and Thornton primary, opened Monday with the other schools of the Jefferson district. All rooms were filled to capacity.

Mr. Louis Nava, Mr. Leo Nava and Mr. Molina left last week for Salmena's resort, Lake county. Deer are reported plentiful in that region and they expect good hunting, planning to return with the limit.

After being moved some time ago to permit the new highway to pass over its old site, the home of Mr. J. Millett is being removed from its stilts. A large basement is being added and a concrete foundation put in.

"The Mysterious Rider," with Jack Holt in the leading role, has been secured a two days engagement at the State Theatre, next Wednesday and Thursday, August 17 and 18. This is a picture you should not fail to see.

Due to the vacation season, work on the petition to annex Colma to Daly City lagged somewhat this week. However its backers promise that a campaign which will be begun early next week will finish up the list of signatures with a healthy margin over the necessary 25 per cent. The document will be brought up Monday, August 22, before the Daly City board of trustees, without fail.

Due to the letup this month in freight through Colma, the assistant freight agent has been granted an indefinite leave of absence until business returns to normal. About six cars of lettuce and some cabbage are leaving daily. The only strong shipments are lettuce and peas from Half Moon Bay. Prices are good, but little offered, as the crops have nearly all been picked.

Constable S. A. Landini is enjoying a vacation in the southern part of the state, being accompanied by Mrs. Landini, and expects to be away about two weeks.

A program of unusual merit will be presented at the State Theatre next Friday, August 19. Lois Wilson and Ricardo Cortez, in "New York," and James Pierce in "Tarzan and the Golden Lion" will be the feature pictures. Friday night will be "Novelty Nite," and an unusually large crowd is expected to be present.

The members of the drill team of El Carmelo Parlor, N. D. G. W., are planning a monster whist party and dance to be given in the Daly City Auditorium on Tuesday evening, August 16. The affair is being given to raise funds to help defray the expenses of the team to Santa Cruz to attend the big Admission Day celebration, and to represent the Parlor and the community. So, help a good cause along and show these girls that they have the co-operation of their community by being present on this occasion. Sylvia Fischer and Annette Lucey are in charge of the arrangements for the evening, and are working hard to make it a success. Don't forget there will also be dancing after the whist.

WEALTHY HONOLULU WOMAN RUN DOWN BY AUTOMOBILE

Mrs. Helen C. Boyd, aged 60, a wealthy Honolulu matron, died Wednesday from injuries received when she was run down at Millbrae by an automobile driven by James B. Williamson, colored, employed at the home of Mrs. M. M. Brown, Hillsborough. A wheel of the car passed over the woman's body, who suffered internal injuries which caused her death shortly after she had been taken to the hospital.

FIRE LAW VIOLATORS BEING PROSECUTED

Vigorous prosecution of fire law violators, resulting in sixty-six convictions, heavy fines and several jail sentences, together with material expansion of the forest patrol system under Governor Young's new budget, were important factors in reducing California's timber losses to a minimum during the first half of the present fire season, State Forester M. B. Pratt declares in his mid-season report. Fire losses to date in areas patrolled by state rangers were placed at $216,722.77 in the report, with 208,237 acres burned over.

In the campaign against violators of the fire laws, eighteen motorists were convicted of throwing cigarettes and burning tobacco from their cars. Twenty-one convictions were obtained for burning without a permit, and thirteen campers were fined for failing to extinguish their camp fires.

SEEKS EXHIBITS FOR COUNTY BOOTH AT THE STATE FAIR

County Horticultural Commissioner A. W. Tate, Jr., announces that he needs fruit and factory products to be used in the San Mateo county exhibit in the State Fair at Sacramento.

"The fruit does not necessarily have to be the product of a farm, but can be taken from a lone fruit tree in a person's back yard," the commissioner said. "The fruit will be called for or will be accepted at the office of the commissioner in the court house in Redwood City. All fruit taken now will be put in cold storage, to be used later in the San Mateo county display at the State Fair at Sacramento."

OMAHA RANKS HIGH IN TELEPHONE AVERAGES

It was in 1877 that the city of Omaha saw its first telephone. Two years later, in 1879, a telephone exchange was established, and, by the end of the year, the first directory was issued, showing 140 subscribers. since that time the telephone has grown steadily in Omaha, with the result that ten years ago there were 45,000 telephones, and now there are more than 62,000 in the city. In fact, Omaha ranks among the first ten American cities of 50,000 population or more in the number of telephones it has in proportion to population, there being 27.1 telephones for each 100 of its inhabitants, which is better than one for every four persons.

TAILOR ADMITS TWENTY BURGLARIES DURING MONTH

Admitting one burglary in San Mateo, and believed by Sheriff James J. McGrath to have been responsible for four in Burlingame, Paul Roland, a tailor, taken into custody at Redwood City by Sheriff McGrath and Deputy Joe Jara, confessed to District Attorney Franklin Swart that he had entered more than twenty homes and business places in San Mateo county during the past month.

The Bureau of Fisheries is aiding fish left stranded by receding Mississippi flood waters. May be they will next do something for fish stranded after a flood of fake oil stock.

Mr. Sharkey is a right good fighter, but he must remember that he can't fight and referee at the same time.

Arizona explorers have discovered an unfinished dam 1,000 years old. Probably an ancient Muscle Shoals.

A man named Pope has announced himself as a candiate for governor in Tennessee. Page Senator Heflin.

NOTICE OF COMMISSIONER'S SALE.

No. 12419.

In the Superior Court of the State of California, in and for the County of San Mateo.

H. H. Smith, Plaintiff, vs. Wm. C. Knox and Susanne Knox, his wife, and Charles Gust and Anastassia Gust, his wife, Defendants.

Under and by virtue of an Order of Sale and Decree of Foreclosure issued out of the Superior Court of the County of San Mateo, State of California, on the 1st day of August, 1927, in the above entitled action, wherein H. H. Smith, the above named plaintiff, obtained a judgement and decree of foreclosure against Wm. C. Knox and Susanne Knox, his wife, and Chales Gust and Anastassia Gust, his wife, the above named defendants, on the 1st day of August, 1927, for the sum of Nine Hundred and Fifty and 00-100 ($950.00) Dollars principal, and One Hundred Fifty-five and 20-100 ($155.20) Dollars interest, making a total of Eleven Hundred Five and 20-100 ($1,105.20) Dollars, which said sum was to draw and bear interest from the 14th day of July, 1927, and Fifty ($50.00) Dollars attorney fees; and Thirty-four ($34.00) Dollars costs of suit, which said judgment was on the 1st day of August, 1927, recorded in Judgment Book 17 of said Court at page 417 and the roll filed and the judgement docketed in the Clerk's office thereof.

I am commanded to sell at public auction in the manner described by law, all that certain real property situate in the County of San Mateo, State of California, described as follows:

Lot numbered 6 in Block lettered T, as shown on that certain map entitled "Map showing subdivision of the property of the Mission Land Co., situated in San Francisco and San Mateo Cos., Cal." filed in the office of the County Recorder of San Mateo county July 31, 1895, in Book "E" of Original Maps at page 71 and copied into Book 2 of Maps at page 73.

Public notice is hereby given that on Tuesday, the 6th day of September, A. D. 1927, at the hour of 11:00 A. M. of that day, at the front door of the Court House of said County of San Mateo, in the Town of Redwood City, in the County of San Mateo, State of California, I will, in obedience to said Order of Sale and Decree of Foreclosure, sell the above described property to the highest bidder for cash, in gold or lawful money of the United States of America.

JAMES J. McGRATH,
Commissioner appointed by said Court.
J. E. McCurdy, San Mateo, California, Attorney for Plaintiff.
First publication in the Daly City Record, August 12, 1927.

(8-12-19-26—9-2)

SIDELIGHTS

It is said the visitors to France in future may be required to pass an intelligence test, or at least bring credentials to show that they are not insane. A contemporary suggests that new arrivals may be confronted with questions like these: "Are you sane or not? If so, why do you come? If not, you can't."

Human vanity makes the pathway of fakirs easy. The British press has warned American visitors against swindlers who look up the pedigree of some ancient family having the same name as the prospective victim, to whom they sell the flattering family history.

Certain divorce agencies in Paris are enterprising to a degree that would do credit to our American go-getters. They offer commissions to janitors of apartment houses for information concerning any married couples whose family rows appear to be heading them toward the divorce court.

Folks of former days were almost as gullible in matters concerning their health as we are. A book of "remedies" published in London in 1618 included such panaceas as crabs' eyes, snails, vipers and the thighbones of hanged men.

It's a long jump from Africa to Harlem, New York's prosperous negro section. That enterprising colored community of 200,000 owns real estate worth $60,000,000, and enjoys the advantage of fine theatres, imposing business buildings, handsome churches and all the other facilities of modern urban life.

The shrinking value of the dollar is illustrated by an old advertisement in the Lubbock, Texas, Avalanche. A Fort Worth saloon announced its willingness to supply "Caney Creek whiskey at $3 per gallon, delivered."

Advertisement writers are not always profound students of history or even current events. One of them recently made two sophisticated periodicals look rather ridiculous a few days ago, when an advertisement containing the following appeared in the weekly New Yorker: "The real reason for the transatlantic flights—the wife of the president of France desires an advance copy of the July Harper's Bazar." All concerned should have known that President Doumergue is a bachelor.

Turning from the hospitable welcoming of American aviators, French editors and politicians have resumed their habitual wordy denunciation of one another. Editor Leon Daudet of the Royalist newspaper L'Action Francaise got off to a good start by printing this: "Premier Raymond Poincaire and his ministers are turkey gobblers, the laughing stock of the universe, the shame of France.

Senorita Lilli de Alverez of Spain after her recent defeat in the tennis finals at Wimbledon, Eng., by our own Helen Wills, proved herself a good sport as well as a wonderful player. Walking off the court with Miss Wills after the game, she stepped behind as they approached the gate. Motioning to Miss Wills to pass, Senorita de Alvarez said: "Queens first."

President Coolidge's affability enabled W. C. Putman, Chicago hat salesman, to win a bet of $100 a few days ago. Putman had wagered that amount with a friend that he could obtain a private interview with the President without an intrduction. Donning a picturesque cowboy costume he called at the summer White House. Thinking him a real cowboy, Mr Coolidge admitted him, chatted awhile, unwittingly aiding Putnam, who had never ridden a cow pony in his life, to win his wager.

A farmer in the vicinity of Evening Shade, Ark., believes in diversification and raises live stock, including houn' dogs. He recently advertised: "Now is your chance to get a hound pup from the famous 'Old Bell' dog of mine. 'Old Bell' took eleven coons, seven 'possums and a mink in three nights last fall. Can trail and tree any varmint that ever ran on four legs."

The most truthful editor has been found. W. R. Montgomery published in his Vindicator, at Sevierville, Tenn., the following: "The late appearance of the Vindicator this week is attributable to several causes, the most principalest of which is that Ye Editor went off on his fourth annual spree and it took him four days to get back and the remainder of the week to get over it."

Germany, too, is disturbed over the falling birth rate. As an encouragement to matrimony, the Berlin board of aldermen has exempted jazz orchestras from the municipal entertainment tax when playing at wedding celebrations.

THE CORRECT THING

Mistress (to new maid): "Nora, you don't seem to know about finger-bowls. Didn't they have them where you worked last?"

Nora: "No, ma'am; they mostly washed themselves afore they come to the table."

TAKE YOUR CHOICE

New Office Boy: "I've added up these figures ten times, sir."

Employer: "Good."

New Office Boy: "And here are the ten answers."

We read that "twin bills" have been introduced in the House and Senate of a state legislature. We hope the idea doesn't spread if its aim is to make them compulsory.

A German burgomaster says the United States could give Europe eternal peace, but we doubt that canceling war debts would do it.

THE MERE THOUGHT

Brown: "Say, old man, it's strange to see you going 'round in that light top-coat this chilly weather while your wife is wearing swell new furs."

Black: "My dear chap, all I have to do is to think of those furs and immediately I start perspiring."

Dr. Butler declared that there is no great man living in the world today, but he didn't say it in Rome.

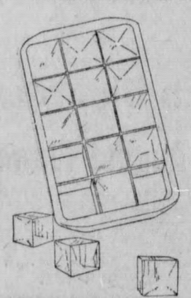
The safe temperature for keeping food

Automatically maintained with the Electric Refrigerator

Like a clear cold Autumn morning, the frosty temperature inside the Electric Refrigerator adds crispness to vegetables. It improves the flavor of meats. It keeps milk sweet on the warmest days. In this cool temperature salads become tastier, more appetizing and delicious.

The Electric Refrigerator automatically maintains the temperature inside the box between 42 degrees and 47 degrees Fahrenheit. This is the safest temperature for keeping food.

You'll need this safe, carefree electric refrigeration, especially if you go away from home a great deal on automobile trips and week-end vacations.



You'll have convenient ice cubes.

STORY FROM THE START

Dr. Ronald McAlister, famous in his special work—applied psychology—employs his leisure time in the elucidation of crime mysteries. As the narrative opens he is interested with Assistant District Attorney Ashton in the murder, in the small town of Oak Ridge, of a recluse, Henry Morgan. The murdered man, his papers reveal, had been in New Zealand, where Doctor McAlister had lived in his youth. Will Harvey has testified he saw a woman wearing a green cloak in the Morgan home the night of the murder. Doctor Reinhardt, friend of McAlister, telephones he has a queer case in his hospital and invites McAlister to see the patient. Doctor Reinhardt's patient proves to be a young woman, who in unconsciousness mutters in a language Reinhardt does not understand. McAlister sees a possible connection between the murdered New Zealander and the girl. A carefully hidden map is discovered. A girl enters the house in the darkness and escapes, leaving a green cloak behind.

CHAPTER IV—Continued

—6—

"I was on the point of telephoning for you," he said, "but you've saved the precious hour or two by coming on your own account. Mallory reported to me here at six o'clock this morning, having come all the way from Oak Ridge on foot, and without getting the slightest trace of the mysterious woman who invaded the Morgan house last night. I confess that her appearance throws a different light on Harvey's testimony. And I think you'll agree that, in all probability, she is the criminal."

"I've no doubt myself," said Doctor McAlister, "that it was her hands that strangled old Morgan."

"Well, then, she's the criminal, isn't she?" said Ashton; and regarding the answer to this question as too obvious to be waited for, he went straight on. "The whole energies of the police and of all the detective force connected with our office will be bent toward finding her. What I want from you—from both of you, independently—is the most complete and careful description you can give of the physical appearance of the woman who entered Henry Morgan's study last night."

"You can describe her for yourself," said Doctor McAlister rather shortly. "You have a talent that way."

"What do you mean?"

"You've seen her. You've enjoyed a good look at her. She's the girl that Reinhardt sent for us to see at St. Michael's two nights ago."

Ashton stared in clear amazement, first at the doctor and then at me.

"You're sure?" he gasped.

"Perfectly," said I gravely.

For a moment he sat silent. Then he frowned.

"May I ask whether you had any suspicion, when we saw her there at the hospital, that she might prove to have some connection with this case?"

"Yes," said my chief bluntly; "it's your right to ask. I did suspect a connection between her and the Oak Ridge mystery. I recognized and understood the language in which she was chattering to herself. It's a language that, with minor variations, is spoken in all those islands in the South Pacific. The thing she was singing to herself was a death chant."

Ashton looked pretty grave at that. "I won't presume," he said, "to question your motive for your reticence with me the other night. Undoubtedly it seemed justifiable to you, but, as a result of it, a dangerous criminal is now at large. I admit it was not a result you could have foreseen, for I remember your recommendation that she be closely watched, and I have no doubt that with the clew you've just given me it won't be many hours before we find her. A strange creature like that, half-wild, chattering a language that no one can understand, cannot remain hidden very long. I can't understand, though," he went on, "the reason you gentlemen have for wishing to withhold from me your full confidence. You haven't given it to me yet. You've dicovered something more that bears upon this case which I haven't heard of."

"We have," said the doctor, "and it was with the purpose of telling you about it that we came back to town this morning—that was part of our purpose, at any rate. Do you remember the green cloak which you so confidently declared to be nothing but a bit of fiction, born of Will Harvey's puerile vanity? Well, we've found that. A green cloak, with a high collar, just as Harvey described it."

Ashton eagerly demanded the details as to where and how the cloak was found, and these I supplied him with.

Then there was a little silence. His displeasure over our previous reticence was suddenly swallowed up in his interest in the revelations we made to him.

"That's one to Mallory, certainly," he said at last. "He was right and I was wrong."

"How do you make that out?" I questioned.

"Didn't I tell you that Mallory suspected Harvey of some active connection with the crime, and thought that he was lying to shield himself? The discovery of the cloak makes it evident that he was right. He knew who the actual criminal was, knows now, and was undoubtedly associated with her. He probably thought to save himself by giving us the clew that would lead to her detection. In his eagerness, he overreached himself and told too much, told more than he could possibly have seen, if his testimony as to how he saw it were true."

He broke off there with a short laugh. "But confess," he said, turning to my chief, "confess that this discovery of Phelps puts your theory of associative illusion completely out of court. Harvey testified to a black-haired woman in a green cloak, and denies that he saw more of her than her silhouette upon the shade. We know now that a black-haired woman in a green cloak was actually there, from which it follows that Harvey lied, knew that he lied. And to have lied thus about a matter which he knew to be vital and significant, he must have some powerful, and probably guilty, motive. I don't believe that you can get away from the logic of that."

"Your conclusion is probable," said my chief, "but it's not inevitable."

Ashton dismissed the denial with a mere tolerant shrug, and set it down to the obstinacy of old age.

"You brought the cloak to town with you, I suppose," he went on presently.

I nodded. "You'll want it, I presume?"

"Yes, he said. "It may prove a valuable bit of bait, not for the girl herself, of course, but possibly for one of her accomplices. I'll have Harvey arrested at once. Surveillance isn't good enough for him now; I want him in jail."

"You promised me a chance at Harvey after you got through with him. Do you remember?" said the doctor. "I hope you don't mean to withdraw it."

Ashton stared at him. "You still think you can beat up anything in that covert?" he asked incredulously. "Oh, well, I've no objection to your trying. I'll have him arrested at once and brought to town. Where do you want him? At your laboratory?"

"Yes," said the doctor. "When may we expect him? This afternoon, some time?"

"Yes," said Ashton. "Not later than four o'clock."

The doctor swallowed the last of his coffee, pushed back his chair, and rose to his great ungainly height.

"Now, let's have an understanding," said he. "I've given you, freely, all the information you've asked for. It comprises pretty much all the information you have which can be of any service to you in the solution of the mystery of this crime. That, of course, is partly due to luck. I believe that I can solve that mystery by my methods. I believe that with your methods you will fail. Phelps and I are going to set about trying to find that girl for ourselves, in our own way. If we find her, we will examine her in our own way; and we sha'n't tell you anything about it until our investigation is complete."

Ashton smiled. "Of course you know," said he, "that you are proposing something that, under my oath of office, I can't permit. If you find that girl—I don't think it very likely that you will, but if you do, I shall be obliged to take her away from you and put her in safe keeping. And the methods I'll use to determine her guilt or innocence will be my methods, and not yours."

The doctor laughed. "That's understood," he said. "You're welcome to take her wherever you can find her, to my laboratary, or anywhere else. But if you don't find her—"

"That's thin ice, Doctor McAlister," Ashton interrupted earnestly. "If you proceed with that express determination of yours, I may find it necessary, little as I'd like to, to have you watched, as persons suspected of compounding a felony."

"All right," said the doctor. "That's understood. Watch away all you like. But you'll still let me have a chance at Harvey?"

Ashton shrugged his shoulders with a vexation that was half-genuine, half-simulated. "You don't deserve it," he said, "but I've made a promise and I'll stick to it."

CHAPTER V

I fully expected that after the grilling he had received at the hands of the district attorney, Harvey would prove a recalcitrant and reluctant subject for the tests we wished to try upon him. He was nervous, it is true, and it took a good deal of reassuring of the most tactful sort, on Doctor McAlister's part, to get him quieted down into anything like a normal state of mind; but he was perfectly willing.

His first sight of the queer, mysterious-looking instruments which our big room contained did nothing to counteract that fear. To the eye of ignorance it must look like a torture chamber from the Inquisition, brought down to date.

My chief spent the better part of an hour taking the young man around and explaining the different instruments to him, and it was not long before young Harvey began to show an inclination to test himself by every electrical and mechanical piece of apparatus in the laboratory. He had forgotten the Oak Ridge mystery, forgotten Ashton, forgotten his recent arrest, forgotten, even, the detective who was waiting in the corridor outside.

He was ready at last for our real experiment. Nothing about Doctor McAlister's manner suggested that there was any difference, from our point of view, between the amusing things we had been doing and the test which he now proposed.

"I'm going to see how quickly you can think," he said. "You're to sit down in this chair, and Mr. Phelps here will read you a list of words. The instant he reads a word, you are to say, aloud, the word it makes you think of—say it just as quickly as you can. You've shown an unusually quick reaction time so far, but this is a better test than any of them. We hang up a pair of little telephones, so—one in front of you and one in front of Mr. Phelps. The moment he speaks a word it makes a little mark on that revolving cylinder. The moment you speak, a second mark is made. The cylinder turns round all the while, and the distance between the two marks shows how quickly or how slowly you think."

I ran my eye down the list which my chief had prepared, with a good deal of care, while we were waiting for them to bring Harvey to the laboratory. The first twelve words were what we call central, that is, they had no connection, so far as we know, with the crime, the mystery or the inquest. In telling us his association with them, which he would probably do freely enough, our subject would establish his normal speed in this sort of mental operation.

But the thirteenth word was Loops and the fourteenth was Pipe. The associations he should announce with those two words and the time he should take in pronouncing them would go far toward establishing a conviction in the doctor's mind and in mine as to whether Harvey had guilty knowledge of the means which had been employed for the old man's murder. If he had such guilty knowledge, if he had seen that ghastly tourniquet made, and twisted it taut himself, or had witnessed the operation, those two simple little words would almost infallibly recall it. The words that would flash into his mind might be violin, perhaps, or throat, or even, possibly, the plain black word murder.

If some such word as that, some damaging, suggestive word, should flash into his mind, one of two things would happen. He would either say it aloud, or he would stop himself from saying it, and deliberately think up another word which, to our ears, could have no sinister significance. But that latter course of action would betray him as certainly as the other, for thought takes time, and the fact that he had been obliged to stop to think would be remorselessly and exactly shown in the chronograph.

(TO BE CONTINUED.)

Killer Whale Has No Equal for Ferocity

The killer whale is the undisputed champion of the sea, declares Mack Sennett, who, as a hobby, has made an exhaustive study of marine life in Lower California seas. "If there is anything that can lick the killer whale, I have never heard of it," Sennett says. "Everything that swims the waters of the earth dreads the terrible killer whale.

"Strictly speaking," the writer explains, "it isn't a fish; it is an air-breathing mammal about 35 feet long. It has huge jaws and heavy fighting teeth. Its head suggests the head of a bulldog, as does its disposition. What makes it more terrible than other big sea monsters is its great speed. Nothing can escape it.

"The favorite dish of the killer whale is the succulent tongue of the real whale," the writer continues. "Its method of killing the whale is curious. When the big fellow comes up to breathe, the killer fastens its jaws on the whale's blowhole and does not let go. Finally, dying of suffocation, the whale thrusts out its great, agonized tongue. The killer nips this off and goes blithely on its way. It is a common sight to find a tongueless dead whale floating in the water."

Ancient Inland Sea

Zuyder Zee is a wide, shallow gulf of the North sea penetrating 60 miles into Holland, and formed in the year 1282 by an inroad of the sea which broke down the protecting sand dunes.

Start of New York Giants Very Small

"And from little acorns mighty oaks shall grow."

Jim ("Truthful Jeems") Mutrie landed in New York city in 1883 with very little money—but he had a scheme. He met John B. Day and proposed that they place some sort of a co-operative baseball team on the Polo grounds in New York city. Day furnished $500 while Mutrie furnished the hustling.

From this small beginning the now powerful organization representing that city in the National league got its start.

RELIEF MEN HAVE LABORIOUS TASK

Their Jobs More Necessary Than Enviable on Club.

In most well-conducted offices there are employees who toil so faithfully and efficiently that they are almost indispensable to the success of the enterprise yet receive little reward in fame or coin of the realm. The business of baseball also has such workers. They are the lads who spend their afternoons in the bull pen ready to rush to the rescue if their more brilliant pitching brothers should weaken.

Their jobs are more necessary than enviable. Too often the records blame them for losing a game which only a miracle could have saved. When they do come through, which is quite frequently, the credit is apt to go to some one else.

In the past baseball has known some very capable relief moundsmen, and the comparative standard is high. Probably among the best known are Garland Braxton and Fred Marberry of the Senators and George Mogridge, who, like the wise man that he is, left the Braves to manage Rochester.

Then there are Rube Ehrhardt and Norman Plitt of Brooklyn's Robins. For four years Rube has viewed most of the Dodgers' games from the bull pens situated in the lee of the right or left field bleachers. This season Plitt has been a far more constant companion than a wife.

Giles Runs Fast

Charlie Giles, above, is one of the crack two-milers of the University of Pennsylvania, and every day after studies can be seen practicing on the track. But it is what he does besides this that is interesting. For the past two years he has been up bright and early in the morning, delivering papers on a route. He skims down the streets with his armful and then is off to school to his studies.

Sport Notes

Soccer football is now played in more than 50 countries.

* * *

Columbia university will take up soccer football in the fall.

* * *

The Cuban tennis experts are not accustomed to play on grass courts.

* * *

Paris is the only city that has entertained the modern Olympic games twice.

* * *

Nearly 100 students entered the University of Pennsylvania boxing team this year.

* * *

Iroquois was the only American-bred horse that ever won the famous English derby.

* * *

A new periodical devoted exclusively to "dog racing" has made its appearance in London.

* * *

Andre Gobert of France is the only athlete to hold the distinction of winning national championships in golf and tennis.

* * *

An Indian tribe in the Dakotas is said to have taken up golf. It is understood that to lay out a course they merely stick up flags in gopher holes.

Financial Considerations

By H. IRVING KING

UP TWO flights of stairs in a dingy office building, in an obscure side-street, was a door upon which appeared the name of Amos K. Foljambee. There was nothing to indicate the nature of the business transacted behind the ground-glass panel of that door, but that it was a business of absorbing importance to those who had connection with it was shown by the anxious looks of those who entered Mr. Foljambee's presence and the despairing or fiercely desperate looks of those who left it. Not every visitor, of course, at first.

Amos Foljambee was a money lender—a broker he called himself—and one of the most remorseless, shrewdest, graspingest Shylocks that ever seized a widow's cook stove.

A widower of fifty, slovenly in his dress and supposed to be immune from female charms Amos had, of late, begun to spruce up wonderfully in his attire and to assume a juvenility which caused his acquaintances to wonder.

The change had come about soon after Amos, calling upon Mr. Manville Brookhurst in the way of business, had chanced to cast his eye upon Madeline, daughter of the broken-down gentleman whom he held in his grip. Madeline was twenty-two, handsome, witty and proud. She had many suitors, went everywhere and everybody said might marry a fortune any day she chose. Brookhurst's only hope of financial salvation lay in her doing so. Amos, who kept tab not only on his customers but upon their relatives, knew all this and, in the belief that one of the many rumors of the girl being about to make a wealthy marriage would prove to be true, had advanced Mr. Brookhurst considerably more money than he otherwise would have done.

But Madeline's marriage to a man of great wealth being unaccountably delayed Amos became alarmed and shut off supplies. He took no long chances. He calculated that by selling out Manville Brookhurst root and branch, and doing it right off, he would be able to get back his investment plus a miserable 8 per cent. It was while calling upon Mr. Brookhurst to announce to him this ultimatum that he first saw Madeline.

He absolutely forced his way past the servant, who said that Mr. Brookhurst was ill and could see no one, entered the living room and found the invalid and his daughter together. Brookhurst turned pale at the sight of the intruder, fell back in his easy chair and pressed his hand to his heart; while he begged Madeline to leave. Amos watched every move of the stately and beautiful girl as she arranged her father's cushions for him and slowly left the room.

Brookhurst looked at him helplessly. Then Amos said with a sigh, "What a wonderful creature your daughter is, Mr. Brookhurst."

"You did not come here to tell me that," replied Brookhurst frigidly.

"No, oh no," replied Amos. "The fact is I came to talk business with you. But I see you are ill and, perhaps, we had better postpone our conference until you feel stronger. I will call again in—in a few days."

Amos called often after that on one pretext or another and at each visit he pressed further loans upon Mr. Brookhurst which the weak man took. At each call Amos inquired for Madeline and inquired in a manner which seemed to threaten. The despairing father called the daughter in, making some excuse to her for doing so.

Finally, one night, Amos sprang the trap. Brookhurst mustered a force which had not been his for years. "It must rest with her," said he. "Go, go at once. Come here two days from now to receive your answer. Go!" Surprised at the turning of the worm, and not a little disconcerted, Amos went. Brookhurst called in Madeline and told her the whole story.

"What would you have me do?" she asked quietly when her father had ended.

"Do as you please," he replied.

"Tom Barrington is in the library," said Madeline; "he called while you were busy with Foljambee and I took him in there. Let us consult him. He ought to have something to say—for we have just become engaged."

Tom came in quite gay and debonaire; an ex-service man, well set up, working for twenty-five dollars a week while he "learned the textile business." Brookhurst, having recovered from his astonishment, went over his story again and Tom heard it with no change of his buoyant manner. "Well, Madge," said Tom, "what do you say? Are you going to marry him?"

"No," replied Madeline. "I'd starve first—but—but poor father!"

Tom actually laughed. "Don't you worry," said he, "that old dud can't hurt us. I'm twenty-five tomorrow. No, I haven't gone crazy, that does have something to do with it. You see Uncle Abijah Jencks left me his half-million in trust until I was of the age of twenty-five. And Amos K. Foljambee, a crony of Uncle Abijah's, was the trustee. It's my money he has been lending out. My lawyers are all ready and tomorrow I'll make Amos K. give an accounting that will make his head swim. Come, Madge, give us a kiss. You don't mind, do you, Mr. Brookhurst?"

TWO HOMES MADE HAPPY

By Women Who Used Lydia E. Pinkham's Vegetable Compound.

"I have taken Lydia E. Pinkham's Vegetable Compound and I think it is the most wonderful medicine I ever tried," is the statement made by Mrs. Goldie Shoup of St. Joseph, Illinois. She declares that after taking the Compound she is in better health than before.

Mrs. J. Storms of 29 Lane Street, Paterson, N. J., writes: "I cannot speak too highly of your medicine and I recommend it to all my friends."

These statements were taken from two enthusiastic letters which tell of the help that has been received from using the Vegetable Compound. Both Mrs. Shoup and Mrs. Storms were in a run-down condition which caused them much unhappiness. When women are suffering from lack of strength and from weakness, their own life and that of their family is affected. When they feel well and strong and are able to do their housework easily, happy homes are the result.

Are you on the Sunlit Road to Better Health?

FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

GOLD MEDAL HAARLEM OIL CAPSULES

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

DO YOU WORRY? STOP IT! It's easy! Guaranteed plan, money refunded if not satisfied. Sent postpaid for $1. Dr. William Kensinger, Paulding, Ohio.

Circular Fashion Offered by Paris

Openings Indicate Return to Line in Day and Evening Dresses.

The reports of the midseason Paris openings foreshadow a return to the circular line in both day and evening dresses. The "malfeloche," as Martial et Armand terms this influence, introduces a semicircular line. There is often a side opening and flared hem, devoid of godets. Patou innovates a lengthened evening silhouette with circular pieces extending below the hem in dinner gowns. Nicole Groult advocates a circular line in front with straight back.

The bolero continues combined with a molded waist and flaring skirt, after the manner of Chantal. Lanvin lengthens the line of the bolero to form a jacket. The removable chiffon jacket as an accompaniment of the sleeveless dining gown still meets with favor. Bloused sleeves, high collars and redingote lines are all given specific mention in these advance reports.

Poiret and Lucien Lelong confer special favor on gray, sponsoring a range of tones including pinky gray and gray green. Black for dinner and street wear is shown at many houses, while an apricot shade is an important newcomer for evening. Amethyst, copper and chestnut browns, wine red, biscuit and dark green are all sponsored for fall daytime wear. Black sometimes is mentioned in combination with bois de rose or blue. For evening, vivid shades are launched, including blues, reds and yellows.

Satin, including crepe satin, receives repeated emphasis for afternoon wear. Sheer velvet is chosen for evening gowns and velveteen is applied in bands on dresses to match accompanying jackets as an early autumn resort mode.

There is a notable indorsement of black lace in dinner gowns, treated in a tailored manner for the most part. Skirts are sometimes box plaited, and black satin belts with rhinestone buckles are the favorite trimming. Tulle, georgette and chiffon are additional evening mediums, the latter often sprinkled with beads. Silk crepes, wool reps and other light weight woolens are prominent in street dresses.

The crepe satin dress is also factor of the new showings, both for afternoon and evening.

There seems to be a decided inclination toward the soft georgette or Roma dress for afternoon wear. Renee shows a number of these carefully studied and giving the impression of layers of georgette one on top of the other. This is also true of the Lelong dresses; every wrap-around skirt seems to be at least four thicknesses of the fabric. Renee's dresses are simple in line, with the only aspect of movement in the wrapover part of the skirt, which is likely to be circular. The distinguishing feature of these dresses lies in the neat touches and trimmings. Narrow satin bands, of a slightly darker tone than the dress itself, are placed around necklines, in the centers of the belts, and at the cuffs. Belts fasten simply with matching buttons and buttonholes. Many of these dresses are matronly in line, but there are also a few youthful ones, retaining the straight line, but with novelty introduced in skirt treatments.

Lumberjack Jacket of Red and Brown Plaid

Gertrude Olmstead, the "movie" star, in mountain garb, which she wears when she spends the week ends close to nature. The skirt is brown with a pin stripe, and the lumberjack jacket is of red and brown plaid.

Lovely White Shawl

In keeping with the marked vogue of white are lovely embroidered shawls of crepe, heavily fringed. The design is large and most exotic in feeling.

Charming Chiffon Frock for Afternoon Occasions

A charming chiffon frock for afternoon wear is worn by Avonne Taylor, the motion-picture player. It is of white chiffon printed in a futuristic striped pattern in all the shades of red. Panels fall loose from the neck to the hip-line front and back. A girdle of self-material encircles the hips. With this frock, Miss Taylor wears a large, black straw hat and black satin slippers.

Tucking Is Prominent on Coats and Dresses

Tucking may be one of the oldest devices of the dressmakers and tailors to ornament a coat or a frock without the use of extraneous ornament, but the sun-ray tuck is spoken of as something new and the clever use of it characterizes many of the products of the dressmakers' establishments this season. One of the most usual modes of using this device is to give decoration to the side of the skirt at the hips, at the same time disposing of the fullnees caused by an upward draping of the skirt at one side. There are groups of sun-ray tucks at one shoulder of some of the frocks and sometimes there are sun-ray tucks symmetrically arranged at the rounded neckline of a bodice.

Milliners still find opportunity for the use of much ribbon, not only in trimming and banding hats, but for the entire construction of small hats. There are shaded ribbons about an inch wide—sometimes a little wider—that range from a deep shade on one side to a light shade on the other and these are used in a circular fashion over light canvas frames to make little hats that are light and wearable for less formal occasions.

Plaited skirts are still in favor, and are chosen to wear with overblouses or cardigans for sports and informal wear. Many of them are made of lightweight checked and striped woolen materials and are usually made without a hem—the line of the selvedge giving a suitable lower edge to the skirt. Usually the plaits are small but so well pressed into the material as to be very nearly permanent—as permanent at least as most permanent hair waves. Sometimes this plaited material is mounted on a belt directly, but to avoid bulkiness around the hips the best plan is to mount the plaited material on a yoke some five or six inches deep of silk which is, of course, hidden beneath the lower edge of the overblouse or cardigan. When the tuck-in blouse is used, this yoke is not to be considered, but the tuck-in blouse is best worn with a skirt of a shaped sort—since a certain smoothness about the hips is desirable.

Bustles, Back Drapery, and Princess Silhouette

Several important dressmaking houses have been added lately to the Paris list of those who sponsor the new princess line. There is a noticeable tendency among the gowns one sees at the Ritz, at Ciro's and the most fashionable night clubs, to fit closer to a normal waistline. The old-fashioned princess line is not yet established. But the idea is undeniably interesting the Parisian designers increasingly.

One of the variations of the fitted line is drapery at the back. Redfern carries this idea to a modified bustle effect. Talbot also shows back drapery, but in less exaggerated form.

Semi-Precious Stones in Bracelets, Chains

Bracelets and chains of heavy roman gold form the basis of the newest ornaments. Wide woven bands, twisted chains and stout links of gold are worn increasingly. Sometimes the ornaments are inset with semi-precious stones like cornelian, lapis, turquois or jade. But the smartest are plain, relying on their workmanship and interesting design.

Some of the prettiest new frocks are banded at the neck and the cuffs with ¾-inch bands of heavy gold link chain. The heavy gold contrasts effectively with the dark blue tucked georgette of the dress.

Daddy's Evening Fairy Tale

BY MARY GRAHAM BONNER

COPYRIGHT BY WESTERN NEWSPAPER UNION

MOSS POND

I must tell you the story about the regatta the bullfrogs gave on Moss pond.

On Top of the Highest Rock.

Moss pond was a beautiful pond down in the valley, surrounded by huge trees and lots of small shrubbery.

It was called Moss pond because for miles around there was nothing but moss. In the pond there were huge rocks, which were covered with moss also.

In the mornings Pappy Frog would get up on top of the highest rock and give his signal, which was:

"Goog-a-room, goog-a-room!"

Then Mother Frog and all neighbor frogs would get up.

And what time do you suppose Pappy Frog would get up?

Sometimes he would get up as early as three o'clock, and, oh, it would make the neighbor frogs so angry!

Of course Mother Frog and the little frogs didn't dare get angry, because Pappy Frog was so severe.

The morning of the regatta Pappy Frog got Mother Frog and the children to help him decorate his boat.

He was very quiet about it, as he didn't dare to wake up the other frogs that morning, for he was extremely proud and wanted his boat to look much finer than theirs.

Of course all the other frogs expected Pappy Frog to awaken them, and when they did wake up, very late, weren't they angry with Pappy Frog?

But they had no time to waste in telling him so, for they had to hurry and scamper to get their boats ready.

At last all was finished and an enormous gathering was present.

There were the moles, the toads, the squirrels, a few of the snakes—Mr. Copperhead, old Blacksnake and Mr. Gartersnake, for he was a neighbor and the Fairy Queen had seen to it that they were all friendly—and the chipmunks.

The frogs had built a bridge across the pond so the more favored of the guests could witness the regatta to better advantage.

Then began the sports.

There were sailing races, canoe races, high diving, swimming races, tub races and obstacle races.

But so many of the little frogs fell overboard in the boat races that most of the time was spent life-saving.

Pappy Frog was very proud of himself, because naturally his boat looked the best of all, and even after the races were over he sailed up and down the pond to get admiration.

The mother frogs had prepared a very fine banquet for all the guests, and the frog who had won the most races was put in the center of all, while the other frogs and guests stood up on their hind legs (if they had legs) and danced around the victorious one.

High Diving.

Pappy Frog did not feel hurt because he had not won the big prize, as he hated "stupid races," as he called them, and all he cared about was the looks of his boat and of himself.

So he, too, joined in all the praise for the prize-winner, and the regatta was voted a very jolly affair by all the guests.

Had to Fight Hard

It was Frank's first day at school. He came home with a distressed look on his face. Mother asked, "Well, Frank, how did you get along at school today?"

Looking solemn and sighing, he replied: "All right, but at recess them kids play harder'n I can fight."

Truth Will Out

Father—I hear your teacher has punished you. What was it for?

Son—I won't tell you.

Father—Then what is the punishment?

Son—I have to write "I must not smoke" 100 times.—Fliegende Blaetter, Munich.

What a Blessing

"Freddy," said the hostess before supper, "do you have grace at your house?"

"Yes," replied Freddy, without hesitation. "I heard a man with a bill tell dad the other day that he had 30 days' grace."

Just an Off Day

"Tommy, you can't seem to get anything right, today?"

"The world's champions slump occasionally, sir," responded the office boy mildly.

Adrift With Humor

CLEVER INTERPRETER

They were looking at a poster which announced approaching performances of Mozart's opera, "Cosi Fan THutte" ("As All Do"). In brackets after the title was "The School for Lovers."

"That's what it means, I s'pose," ventured she.

"Yes," he replied. "Cosi, school; fan, for; tuttle, lovers, like you and me, you know," with a squeeze of her arm.

"Lor, dearie, you are clever," she said.

LIKE A WOMAN

"Well, at least, I can say I'm a self-made actress."

"Don't bother to apologize, dear. I'd just make the best of it."

Not Much Settled

On history's pages we behold
Descriptions of the battle bold,
Which have, so far as we can see,
Still left mankind to disagree.

Excited

"What was that film my wife saw last night?"

"It was laid in the time of Queen Elizabeth several hundred years ago."

"That's all right, then."

"What happened?"

"My wife came home very much excited. She thought she had discovered some new fashions and was away out of style."—Louisville Courier-Journal.

More Fun Going in Debt

Blinks—Well! Well! You have a smile on your face today, the first time I've seen you with one for months. What's happened?

Jinks—Oh, my wife and I declared we'd rather be happy than thrifty, and chucked the dern budget into the furnace last night.

GOT BIT

He—Why are you putting on so much dog?

She—I always do when I meet puppies.

He Dassen't

A papa never
Makes a howl
At female haircut
Like peeled owl.

Had Her There

Pouting Wife (charged with extravagance)—You used to tell me I was perfect.

Husband—I was mistaken, by your own showing. Perfection wouldn't be purchasing all this paint, powder and other stuff to improve itself.

The Talent

Jack—What's a gold digger?

Mary—a girl who can spend all your money and make you think you spent it.

Careful Shopper

Dear Old Lady—Are there any germs on these turnips?

Grocer—I can assure you, ma'am, that they were raised in nice clean dirt from sterilized seeds! How many will you have?

Waiter!

He—I thought the doctor told you not to eat any rich food before going to bed.

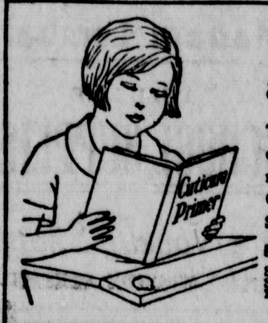
She—Then I won't go to bed. Order me some lobster salad, please.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Proven directions on each package. Physicians everywhere recommend it.



Childhood's Lessons affect the whole life

Teach your children to use Cuticura Soap daily to keep the skin clear. Soothe and heal rashes, eczemas and other irritations with Cuticura Ointment. Shampoo with Cuticura Soap to keep the scalp in a healthy, hair-growing condition.

Soap 25c. Ointment 25 and 50c. Talcum 25c. Sold everywhere. Sample each free. Address: "Cuticura Laboratories, Dept. 38, Malden, Mass."

Cuticura Shaving Stick 25c.

The Likeness

She—You remind me of the sea.
He—Wild, romantic, relentless—
"No—you just make me sick."

Popularity

"A good chef gets more than a college professor." "Why shouldn't he? A lot more people take his courses."

BAYER

Genuine ASPIRIN

SAY "BAYER ASPIRIN" and INSIST!

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years.

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions.

Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Badger holes and, to a lesser extent, prairie dog holes are harder on very young lambs than are coyotes, in the opinion of a number of forest rangers.

Ivory is properly the material of the elephant's tusks, but some rhinoceros horns and hippopotamus teeth find their way into the ivory market.

Here's Speedy Relief for Tender, Aching, Swollen Feet

Your Druggist Says Emerald Oil Must Give Complete Satisfaction *or Money Cheerfully Refunded.*

Your feet may be so swollen and inflamed that you think you can't go another step. Your shoes may feel as if they are cutting right into the flesh. You feel sick all over with the pain and torture and pray for quick relief. What's to be done?

Two or three applications of Moone's Emerald Oil and in fifteen minutes the pain and soreness disappears. A few more applications at regular intervals and the swelling reduces.

And as for Soft Corns and Callouses a few applications each night at bed time and they just seem to shrivel right up and scale off.

No matter how discouraged you have been with powders, footbaths or other applications, if you have not tried Emerald Oil then you have something to learn.

It's a wonderful formula—this combination of essential oils with camphor and other antiseptics so marvelous that thousands of bottles are sold annually for reducing varicose or swollen veins.

Every good druggist guarantees the first bottle of Moone's Emerald Oil. It must end your foot troubles or money back.

DALY CITY

NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

Mrs. H. M. Cahn spent a few days in Redwood City during the past week.

Mr. A. Cobleigh, of Peoria street, began a two weeks vacation on Thursday.

Mrs. A. J. Richardson, of San Quentin, is visiting her sister, Mrs. E. R. Blaylock, of Evergreen avenue, this week.

Miss Vera Euranie, of 6178 Mission street, has just returned home from Monte Rio, where she spent a two weeks' vacation.

Mrs. H. E. Brown visited her niece, Mrs. Foppiano, of Evergreen avenue, on Tuesday.

Miss Gussie Devlin and Mr. A. Cancille spent last Sunday at San Jose, visiting friends.

Mrs. A. Devlin and daughter Irene spent Sunday at Fairfax, visiting Mr. and Mrs. Arthur Ganz.

Mr. and Mrs. S. A. Landini left Tuesday on a pleasure trip to the southern part of the state, expecting to even cross the border during their absence and visit the famed Tijuana.

A. L. Stockton and family are enjoying a vacation on the Yuba river.

B. Milano, of Templeton avenue, purchased a new Kleiber truck last Tuesday.

Mrs. P. Ross and daughter Mildred returned home Sunday from a week's visit in Santa Rosa.

Miss Katherine McKeown, 6099 Mission street, spent last week visiting friends in Bakersfield.

William Gilson, nephew of Mr. G. Gilson, returned Saturday after a four months trip to Texas.

"God and the Groceryman," by Harold Bell Wright, is now ready for circulation at the John D. Daly library.

The Associated Firemen of San Mateo county will hold a ladies' night next Tuesday in the Burlingame fire house.

Members of Crocker Chapter, Order of De Molay, went on another roller skating party at Dreamland Rink last Tuesday.

Misses Mary Brennan and Gertrude Murphy returned Sunday with friends after a two weeks' vacation at Guerneywood Park.

Mrs. A. Cochran and daughter Particia and Earl McDaniels motored to Sonoma last Sunday to visit Mrs. J. C. McDaniels, Earl's mother.

Mrs. J. Frary, of 350 Crocker avenue, returned home Saturday from Texas, being accompanied by her son, who has been seriously ill.

Mr. and Mrs. Van Heusden, of 63 Woodrow street, returned last week from a delightful vacation spent in Los Angeles and Pasadena.

Mrs. G. Berwick, of 17 Como street, returned home Saturday from the Community hospital, and is now on the road to complete recovery.

W. M. McGregor, of the Record, is enjoying a vacation this week, spending the time motoring to nearby points of interest, and expecting to indulge in some fishing.

Mr. and Mrs. J. J. Kennedy and family returned Sunday from their annual vacation in the Big Basin. Mr. Kennedy is our fire chief and water works superintendent.

Charles Parker, of 369 Vista Grande avenue, arrived home Thursday from the Orient, after a six months absence. Mr. Parker is the chief wireless operator on the President Lincoln.

Mr. and Mrs. Barnd and family, of Ness City, Kansas, who visited with Mr. Barnd's sister, Mrs. A. Gehringer, left Tuesday for their home, going by way of Los Angeles.

Dave Campbell, local plumber, will leave tomorrow on his semi-monthly pilgrimage to Boyes Springs. It is generally understood that these trips are the means of keeping Dave so young and jovial.

T. L. Quinlan, recently appointed deputy sheriff, was in Daly City last Wednesday on business, and was being congratulated by his many friends in this vicinity upon his selection to this responsbile position.

The members of Company No. 4, Daly City Volunteer Fire Department, enjoyed their annual ride to Steven's Creek. This is a long established event and one looked forward to and greatly enjoyed each year.

Mrs. Rice, nee Margaret Adriance, has resigned as kindergarten teacher at the R. S. Thornton primary school and moved to Oakland. She has been here two years. Miss Miller is the new teacher.

The members of the drill team of El Carmelo Parlor, N. D. G. W., are planning a whist party and dance to be given in the Daly City Auditorium on Tuesday evening, August 16. Mrs. Sylvia Fischer and Annette Lucey are in charge of the arrangements for the evening.

Miss Clara Foppiano, of Evergreen avenue, will be married to Mr. M. Tacchi, of South San Francisco, on Sunday, August 21, at 4 p. m., in the Grace Methodist church at Twenty-first and Capp streets, San Francisco. Both are very well known and popular and their many friends wish them every happiness.

A surprise party was given Mrs. R. Green, of Colma, by a number of her friends, last Friday afternoon. Many beautiful presents, suitable for her new home, were received by Mrs. Green. Those present were Mrs. G. Wright, Mrs. H. Volkman, Mrs. B. Silicani, Mrs. A. Witt, Mrs. M. P. Henderson and Mrs. P. Breck, of Berkeley.

E. J. Dold, superintendent of the Daly City post office, has returned from a vacation trip of three weeks duration. Mr. and Mrs. Dold and family visited in the southern part of the state and also spent a few days at Guerneyville, and report having enjoyed a splendid outing. Mr. Dold is a most efficient and courteous official and his many friends are glad to see him back at the post office.

Katherine Aiello and Theresa Campagno recently enjoyed a two weeks' visit with friends in Crockett.

John Emerson, of Peoria street, will enter as an advanced junior into the University of California on Monday.

Mrs. L. T. Cook, city water clerk, is spending her vacation in Portland. Her son Fletcher is acting clerk during her absence.

Mrs. B. Milo and family and Mrs. R. Cullen, of Templeton avenue, returned Sunday from a months' vacation spent at Capitola.

Mr. and Mrs. Ed. Ford left Monday on a trip to Salt Lake City, Utah. They will motor by way of Reno, and expect to be gone about two weeks.

Mr. and Mrs. Gregory and family have returned to the city after several months spent at their summer home in the southern part of the county.

Dr. and Mrs. F. Callsen, Mrs. A. Laborie and son Victor, all of the Richmond district, San Francisco, dined with Mr. and Mrs. H. Fellows last Tuesday.

It is said that Louis Ross, local grocer, is gaining quite a reputation as a song leader. At least that's the report that comes from the recent Lions Club luncheon.

Mr. and Mrs. Rocker, of Omaha, are visiting their son, Mr. Rocker of Henry's barber shop, and are being shown the points of interest in this section by Mr. Rocker.

One of the most widely discussed photoplays of the season, Mrs. Wallace Reid's "The Red Kimono," will be presented at the State Theatre next Monday and Tuesday, August 15 and 16. There will be other attractions of unusual interest.

A double feature program will be provided for patrons of the State Theatre next Sunday, August 14. The two feature pictures will be Bebe Daniels in "A Kiss in a Taxi," and George O'Brien in "Rustling for Cupid."

J. F. Adams, of Burlingame, manager of the San Mateo, Burlingame and Hillsborough exchange of the Pacific Telephone and Telegraph Company, was in Daly City on Wednesday and was a welcome caller at the Record office.

Mr. and Mrs. Louis Silver recently moved into the building at 5995 Mission street, in which Mr. Silver's County Line Tonsorial Parlors are located. They now have a cozy home and Louis does not have to depend on the street cars to reach his pl ce of business.

Miss Angelina Fontana was given a surprise shower recently by the girls of the Relish Bakery, at the home of Mrs. Frier. Mrs. Martin and Mrs. G. Ford were also present. Miss Fontana is to be married to Mr. Al Siler in the near future.

The 13th may be unlucky for some people, but it should be a lucky date for the patrons of the State Theatre, as next Saturday, August 13, the bill at this popular local movie house will include Reginald Denny in "The Cheerful Fraud," and the Kiddie Revue, as well as other attractions.

Jay Sommerkamp, local Pacific Gas and Electric Company representative, has been enjoying a partial vacation, with a day or two in town and then a few days in Big Basin. He was on the job at the Lions Club meeting last Monday, he being the efficient secretary of that organization.

W. J. Lantheaume, local dentist, is back at his office following a three weeks' vacation, and he declares he feels able to take care of all the business that comes his way. During his absence from Daly City he visited Reno, Carson City, Lake Tahoe and Yosemite, and reports having had a wonderful time, finding the roads in excellent condition and no trouble with the "bus."

Miss Margaret Johnston and Mr. Harold Pettigrew, both of Daly City, were united in marriage Saturday at St. Maximus church, Rev. James Donohoe performing the ceremony. The best man was the bride's brother and the bridesmaid was her sister. A reception was held at the bride's home for the immediate relatives following the ceremony.

Mrs. Gladys Lehr, 538 Templeton avenue, celebrated her twenty-first birthday last Saturday, she being the honor guest at a party given by her parents, Mr. and Mrs. William Hudgeon. About eighteen of her intimate friends were present, and the evening was joyously spent in games, music and dancing, all report having had a glorious time. Mrs. Lehr was the recipient of many beautiful and useful presents.

A number of friends of Claude B. Rich, local realtor, who had anticipated enjoying a gift of venison the fore part of the week, upon the return of Mr. Rich from a deer hunt, were somewhat disappointed, many being of the opinion that they had been forgotten in the distribution of the spoils of the hunt. But it is rumored that the tags required of all slayers of deer, under the new law, are still in the possession of the local huntsman, who is hoping for better luck on the next trip.

J. L. Brown and son Ralph are on a trip to British Columbia. They propose returning by way of Yellowstone Park, Salt Lake City, Reno and Tahoe. They love the sunshine, the open road, the scenery and the automobile, and believe in getting all they can out of life. The inspiration of this trip of theirs was the grateful generosity of one of J. L.'s old time Missiouri pals.

MAN IDENTIFIED AS DEAD NOW LANGUISHES IN JAIL

Arrest of George D. Tripp, former postal clerk at Angel Island, by postal inspectors at San Francisco last Monday proved that identification of a body at San Rafael last week as that of Tripp was mistaken. Tripp is accused of having escaped from the island with approximately $2,000 in post office funds. The body of a man found in the bay last week was identified by Tripp's father-in-law and an army adjutant on Angel Island.

SENSE AND NONSENSE

By H. H.

VOLUME I FRIDAY, AUGUST 12, 1927 NUMBER 3

Published in the interests of the people of Daly City and vicinity by H. H. Smith and Employees.

"That's my home!" The proudest statement a man can make.

How much whisky can a Scotchman drink?

Answer: Any given amount.

"When we get to Niagara, dear, let's try to look like we were not newly wed."

"Good idea, darling. You carry the suitcase, eh?"

There's joy in having a bin full of coal for the winter.

Sympathetic Person: "Hello! What is it, my boy? Are you lost?"

Little Boy: "Yes, I am. I mighta known better than to go out with grandma. She's always losin' sumpin'.

Barnum used to say that the public likes to be humbugged, but Barnum ran a circus—he never conducted a lumber business.

Curious: "Why do they call a sail boat 'She?'"

Cautious: "Because they make a better showing in the wind."

Unlucky Motorist: (Having just killed the lady's puppy): "Madam, I will replace the animal."

Indignant Owner: "Sir, you flatter yourself."

When you think of building, think of H. H.

Mack: "Got a thumb tack?"

Jack: "No, but I gotta finger nail."

Inquisitive child: "Mother, what is a waffle?"

Bright Brother: "It's a non-skid pancake."

It's fun to build a home. Your home! We can help you with your plans.

An old Chinaman, delivering laundry in a mining camp, heard a noise and espied a huge brown bear sniffing his tracks in the newly fallen snow.

"Huh!" he gasped. "You likee my tlacks, I makee some more."

You've been waiting a long time to build that new home. And there's no better time to build than right now.
